ACKNOWLEDGEMENTS

I am extremely grateful to Prof. D.V.S. Jain, Department of Chemistry, Panjab University, Chandigarh and express my deep gratitude and sincere thanks for his constant inspiring guidance, untiring and invaluable help during the period of this research work. Without his supervision it would have not been possible for me to complete this research work.

I am also thankful to Dr. S. K. Gupta, Department of Chemistry, Panjab University, Chandigarh for his timely guidance, encouragement and motivation from time to time.

I thank the management of the Central Scientific Instruments Organization, Chandigarh, for permitting me to carry out this work at CSIO. I express my gratitude to Dr. R. P. Bajpai, Director, CSIO, for his constant encouragement and support.

I sincerely thank Mr. M. L. Sharma and Mr. Avtar Singh of Central Instrumentation Laboratory, Panjab University, Chandigarh for their valuable help in electron-microscopy and NMR spectra of the sample compounds. My sincere thanks are also due to the Director IIP Dehradoon for his kind help in surface area measurement and IR spectra of polyaniline samples.

I thank my colleagues Dr. P. K. Jain, Mr. Mewa Singh and Sh. Baldev Raj for their direct and indirect help during my research work.

In last but not the least I acknowledge the contributory role played by my wife Smt. Shashi Kiran and my children for their co-operation without which completion of this work would have not been possible.

(MADAN LAL SINGLA)
