CONTENTS

INTRODUCTION 1-3

REVIEW OF LITERATURE 5-55

Background 5

Synthesis of nitric oxide (NO) 6

Nitric oxide synthases (NOS) 7

Localization of nitric oxide synthases in the kidney 9

 Constitutive NOS:
  Nitric oxide synthase I 10
  Nitric oxide synthase III 11

 Inducible NOS:
  Nitric oxide synthase II 12

Regulation of nitric oxide synthases: Physiology 12

Regulation of nitric oxide synthases: Pharmacology 13

NOS in the renal vasculature 14

 Functional role of nitric oxide in the kidney 15
  Renal cortical hemodynamics 17
  Renal medullary hemodynamics 18
  Tubuloglomerular feedback 19
  Autoregulation of renal blood flow 19
  Angiotensin II interaction 20
  Renin secretion 20
  Glomerular arterioles 22
  Mesangial cells 22
Glomerular epithelial cells 23

Renal pathophysiology and nitric oxide 25
  Hypertension and hypotension 25
  Nitric oxide and acute renal failure (ARF) 27
    NO in ischemic ARF 29
    NO in nephrotoxic ARF 30
  Renal nitric oxide pathway in chronic renal failure (CRF) 35
    Mechanisms leading to impaired renal NO system in CRF 37

Renal transplantation and nitric oxide system 39

Therapeutic potential of nitric oxide donors and inhibitors 40
  NO Donors 40
    L-arginine 40
    Molsidomine and its metabolites 47
    Nebivolol 50
    Resveratrol 51
    Statins 52
  NO inhibitors 53

AIMS AND OBJECTIVES 57
