ACKNOWLEDGMENTS

Pursing a Ph D was always a dream for me. The completion of my dissertation and subsequent Ph D has been a long journey. It’s true that “The best and the most beautiful things in the world cannot be seen or even touched; they must be felt with the heart.” When I was completing my dissertation, life doesn’t stand still, nor wait until I finished, but I am fortunately blessed to have time, courage and people around me to deliver it.

During these years of Ph D, I have had the fortune to know a lot of interesting people whose value contributed to build an amazing working environment. Working with them has improved me in a professional and personal way. I recall the moments of study, work, and fun with enthusiasm. Without their ideas and their support, this thesis would never have happened.

This dream would have not been achieved without the supports of my research guide Dr. M. Razaullah Khan. He noticed my passion in the field of Computer Applications through my eyes and took my hands to step forward towards my ambition. My gratitude goes to him for his guidance, valuable support, wisdom, consistent encouragement and continuous follow ups, until I reached this point. His patience, flexibility, genuine caring and concern, and faith in me during the dissertation process enabled me to attend to life while also earning my Ph D.

I’d also like to give a heartfelt, special thanks to Dr. S. A. Mannan, and the faculty members of Maulana Azad College, Aurangabad. They have been motivating, encouraging, and enlightening. They never judged nor pushed when they knew I needed to juggle priorities. We’ve laughed together and they have also been kind when I needed to regain. When others doubted, they remained a fan. When I became too serious, their humor and friendly sarcasm allowed me to laugh and lightened my perspectives. For this, I cannot thank them enough. I am forever grateful.

My gratitude is also extended to some organizations. When I began this doctoral program, I always got a tremendous help no matter the task or circumstance. I
couldn’t have completed all the required literature survey, paperwork, & analysis and delivered it to the correct form. To name few of them, NIC Pune, C-DAC Pune, University of Pune, Department of Management Sciences, DBAM University, Aurangabad, Center of e-Governance, IIM, Ahmedabad, Various Departments Government of Maharashtra, especially, Department of Information Technology, Pune Municipal Corporation and Pimpri Chinchwad Municipal Corporation.

I would like to extend my gratitude to all those researchers, authors and academicians who made a pathway for me. Their research papers, articles, books gave me the thrust which I was searching for. When I look back, I see all those faces, who turned my life from ‘somebody holding my finger in warm hand’ to the ‘confident shake hand’. I really want to say thanks to all my teachers, friends and playfellows.

At the banquet table of nature, there are no reserved seats. You get what you can take, and you keep what you can hold. And you can’t take anything without organization. My sincere gratitude goes to my institute and colleagues in the JSPM Group of Institutes, Pune, and my office mates.

I conclude with Pune, where the most basic source of my life energy resides: my family. I have an amazing family, unique in many ways, and the stereotype of a perfect family in many others. Their support has been unconditional all these years; they have given up many things for me to be at my work; they have cherished with me every great moment and supported me whenever I needed it. And I need to thank them now... The completion of this work was greatly contributed by the support of and the sacrifices made by my parents, my gorgeous wife Nazneen, my pretty daughter Anaum, and my lovely son Ayan. My absence gave them a difficult time that words may never be able to explain. It is their love and commitment that kept me motivated to complete this work. I thank and love them dearly.
