# LIST OF TABLES

1. Black gram Seed Germination in Plastic trays (10 seeds /tray)
2. ANOVA of Black gram Seed Germination in Plastic trays
3. Effect of 0.0005% concentration of Chloropyriphos on root length (cm) in Black gram
4. Effect of 0.0005% concentration of Chloropyriphos on shoot length (cm) in Black gram
5. Effect of 0.0010% concentration of Chloropyriphos on root length (cm) in Black gram
6. Green gram seed germination in Plastic trays (10 seeds/ tray)
7. ANOVA of Green gram Seed Germination in Plastic trays
8. Effect of 0.0005% concentration of Chloropyriphos on root length (cm) in Green gram
9. Effect of 0.0005% concentration of Chloropyriphos on shoot length (cm) in Green gram
10. Effect of 0.0010% concentration of Chloropyriphos on root length (cm) in Green gram
11. Black gram seed germination in Pot culture
12. ANOVA of Black gram seed germination in Pot culture (20 seeds / pot)
13. Height (cm) of black gram seedlings during First week
14. ANOVA of Height (cm) of black gram seedlings during First week
15. Height (cm) of black gram seedlings during Second week
16. ANOVA of Height (cm) of black gram seedlings during Second week
17. Height (cm) of black gram seedlings during Third week
18. ANOVA of Height (cm) of black gram seedlings during Third week
19. Green gram seed germination in pot culture (20 seeds/ pot)
20. ANOVA of Green gram seed germination in pot culture
21. Height (cm) of green gram seedlings during First week
22. ANOVA of Height (cm) of green gram seedlings during First week
23. Height (cm) of green gram seedlings during Second week
24. ANOVA of Height (cm) of green gram seedlings during Second week
25. Height (cm) of green gram seedlings during Third week
26. ANOVA of Height (cm) of green gram seedlings during Third week
27. Estimation of protease enzyme (unit/ml) in Black gram seedlings
28. ANOVA of Protease enzyme (unit/ml) in Black gram seedlings
29. Estimation of protease enzyme (unit/ml) in Green gram seedlings
30. ANOVA of Protease enzyme (unit/ml) in Green gram seedlings
31. Estimation of Amylase enzyme (unit/ml) in black gram seedlings
32. ANOVA of Amylase enzyme (unit/ml) in black gram seedlings
33. Estimation of Amylase enzyme (Unit/ml) in Green gram seedlings
34. ANOVA of Amylase enzyme (Unit/ml) in Green gram seedlings
35. Black gram seed weight (g) in control and treated field plots during Rabi season (December-March)
36. ANOVA of Black gram seed weight (g) in control and treated field plots during Rabi season (December-March)
37. Green gram seed weight (g) in control and treated field plots during Rabi season (December-March)
38. ANOVA of Green gram seed weight (g) in control and treated field plots during Rabi season (December-March)
39. Black gram seed weight (g) in control and treated plots during Kharif season (August – October)
40. ANOVA of Black gram seed weight (g) in control and treated plots during Kharif season (August – October)
41. Green gram seed weight (g) in control and treated plots during Kharif season (August – October)
42. ANOVA of Green gram seed weight (g) in control and treated plots during Kharif season (August – October)
43. Chloropyriphos residue quantification in 21 days old Black gram (BG) and Green gram (GG) seedlings
44. Chloropyriphos residue quantification in Black gram and Green gram fresh seeds
45. Chloropyriphos residue quantification in Black gram and Green gram one year stored seeds
