ACKNOWLEDGEMENTS

I owe a deep sense of unbounded indebtedness to my supervisor, Dr. (Mrs.) I.P. Sharma (Reader), Department of Education, Panjab University, Chandigarh, for her ungrudging support in providing expert advice from time to time at every stage of the study. Her excellent spirit, constant encouragement, illuminative guidance coupled with her kind and sympathetic behaviour, not only made it possible for me to benefit from her helpful comments but also aroused in me a habit of clear thinking as a researcher.

My thanks are due to Professor Harish Sharma, Chairman of the Department of Education, Panjab University, Chandigarh, for providing me all the necessary facilities and cooperation in the department.

Acknowledgement of deep appreciation is extended to all the faculty members of the Department of Education Panjab University, Chandigarh, for their expert advice and encouragement during the course of the present investigation.

With a deep sense of gratitude, I take this opportunity to thank the Ministry of Culture and Higher Education of The Islamic Republic of Iran for granting my parents permission to send me the necessary funds for my expenditure here during the period of this investigation.

It gives me an immense pleasure to express my deep sense of indebtedness and record my feelings of appreciation for my respected parents and dear brothers who proved to be inspiring and understanding sources of encouragement and support throughout the course of the study. In fact, the work is dedicated to them who in their unique way have made it possible for me to complete it. I am internally grateful to them for tolerating all the disruptions and turmoil this undertaking created in their lives.

I cannot adequately express the appreciation that I feel to all those persons who helped me, in a wide variety of ways, in the execution and completion of the study. But I cannot also escape my duty of recording my feelings of appreciation to Mr. Tassew Zewdie of Ethiopia, who has been a very close friend of mine, for his genuine help and encouragements during the investigation. My special thanks are also due to all the fathers of primary school going children who have participated as interviewees during the time of data collection.

Finally, I wish to express my sincere appreciation to all authors whose works I have consulted so frequently and quoted in my research work.
