6.8 Significance of Difference between the Means of Flexibility Scores, Activity III, of Intellectually Gifted and average children

6.9 Significance of Difference between the Means of Originality Scores, Activity III, of Intellectually Gifted and average children

6.10 Significance of Difference between the Means of Fluency Scores, Activity IV, of Intellectually Gifted and average children

6.11 Significance of Difference between the Means of Flexibility Scores, Activity IV, of Intellectually Gifted and average children

6.12 Significance of Difference between the Means of Originality Scores, Activity IV, of Intellectually Gifted and average children

6.13 Significance of Difference between the Means of Fluency Scores, Activity V, of Intellectually Gifted and average children

6.14 Significance of Difference between the Means of Flexibility Scores, Activity V, of Intellectually Gifted and average children

6.15 Significance of Difference between the Means of Originality Scores, Activity V, of Intellectually Gifted and average children

6.16 Significance of Difference between the Means of Fluency Scores, Activity VI, of Intellectually Gifted and average children

6.17 Significance of Difference between the Means of Originality Scores, Activity VI, of Intellectually Gifted and average children

6.18 Significance of Difference between the Means of Fluency Scores, Activity VII, of Intellectually Gifted and average children

6.19 Significance of Difference between the Means of Flexibility Scores, Activity VII, of Intellectually Gifted and average children
6.20 Significance of Difference between the Means of Originality Scores, Activity VII, of Intellectually Gifted and average children

6.21 Significance of difference between the Means of Total Fluency Scores of Intellectually Gifted and Average Children

6.22 Significance of difference between the Means of Total Flexibility Scores of Intellectually Gifted and Average Children

6.23 Significance of difference between the Means of Total Originality Scores of Intellectually Gifted and Average Children

6.24 Significance of difference between the Means of Total Creativity Scores of Intellectually Gifted and Average Children

6.25 Significance of Difference Between the Means of Fluency Scores of Intellectually Gifted Boys and Girls

6.26 Significance of Difference Between the Means of Flexibility Scores of Intellectually Gifted Boys and Girls

6.27 Significance of Difference Between the Means of Originality Scores of Intellectually Gifted Boys and Girls

6.28 Significance of Difference Between the Means of Total Creativity Scores of Intellectually Gifted Boys and Girls

6.29 Difference Between the Means of Fluency Scores of Boys and Girls of Average Intelligence

6.30 Difference Between the Means of Flexibility Scores of Boys and Girls of Average Intelligence

6.31 Difference Between the Means of Originality Scores of Boys and Girls of Average Intelligence
6.32 Difference Between the Means of Total Creativity Scores of Boys and Girls of Average Intelligence

6.33 Significance of Difference Between the Means of Fluency Scores of Intellectually Gifted and Average Boys

6.34 Significance of Difference Between the Means of Flexibility Scores of Intellectually Gifted and Average Boys

6.35 Significance of Difference Between the Means of Originality Scores of Intellectually Gifted and Average Boys

6.36 Significance of Difference Between the Means of Total Creativity Scores of Intellectually Gifted and Average Boys

6.37 Significance of Difference Between the Means of Fluency Scores of Intellectually Gifted and Average Girls

6.38 Significance of Difference Between the Means of Flexibility Scores of Intellectually Gifted and Average Girls

6.39 Significance of Difference Between the Means of Originality Scores of Intellectually Gifted and Average Girls

6.40 Significance of Difference Between the Means of Total Creativity Scores of Intellectually Gifted and Average Girls

6.41 Significance of Difference Between the Means of Fluency Scores of First, Second and Third Born Intellectually Gifted Children

6.42 Significance of Difference Between the Means of Flexibility Scores of First, Second and Third Born Intellectually Gifted Children

6.43 Significance of Difference Between the Means of Originality Scores of First, Second and Third Born Intellectually Gifted Children
6.44 Significance of Difference Between the Means of Total Creativity Scores of First, Second and Third Born Intellectually Gifted Children

6.45 Significance of Difference between the Means of Fluency Scores of First, Second and Third Born Intellectually Average Children

6.46 Significance of Difference between the Means of Flexibility Scores of First, Second and Third Born Intellectually Average Children

6.47 Significance of Difference between the Means of Originality Scores of First, Second and Third Born Intellectually Average Children

6.48 Significance of Difference between the Means of Total Creativity Scores of First, Second and Third Born Intellectually Average Children

6.49 Significance of Difference Between the Means of Fluency Scores of First Born Intellectually Gifted and Average Children

6.50 Significance of Difference Between the Means of Flexibility Scores of First Born Intellectually Gifted and Average Children

6.51 Significance of Difference Between the Means of Originality Scores of First Born Intellectually Gifted and Average Children

6.52 Significance of Difference Between the Means of Total Creativity Scores of First Born Intellectually Gifted and Average Children

6.53 Significance of Difference Between the Means of Fluency Scores of Second Born Intellectually Gifted and Average Children

6.54 Significance of Difference Between the Means of Flexibility Scores of Second Born Intellectually Gifted and Average Children

6.55 Significance of Difference Between the Means of Originality Scores of Second Born Intellectually Gifted and Average Children
6.56 Significance of Difference Between the Means of Total Creativity Scores of Second Born Intellectually Gifted and Average Children

6.57 Significance of Difference Between the Means of Fluency Scores of Third Born Intellectually Gifted and Average Children

6.58 Significance of Difference Between the Means of Flexibility Scores of Third Born Intellectually Gifted and Average Children

6.59 Significance of Difference Between the Means of Originality Scores of Third Born Intellectually Gifted and Average Children

6.60 Significance of Difference Between the Means of Total Creativity Scores of Third Born Intellectually Gifted and Average Children

7.1 Product Moment Correlation between Creativity Measures and Socio-Economic Status of Intellectually Gifted Children for Total Sample and High, Average and Low Socio-Economic Groups

7.2 Product Moment Correlation between Creativity Measures and Socio-Economic Status of Intellectually Average Children for Total Sample and High, Average and Low Socio-Economic Groups

7.3 Significance of Difference between the r's of Creativity Measures and Socio-Economic Status of Intellectually Gifted and Average Children

8.1 Product Moment Correlation between Creativity Measures and Social Adjustment of Intellectually Gifted and Average Children

8.2 Product Moment Correlation between Creativity Measures and Emotional Adjustment of Intellectually Gifted and Average Children

8.3 Product Moment Correlation between Creativity Measures and Educational Adjustment of Intellectually Gifted and Average Children
8.4 Significance of Difference between r's of Creativity Measures and Social Adjustment of Intellectually Gifted and Average Children

8.5 Significance of Difference between r's of Creativity Measures and Emotional Adjustment of Intellectually Gifted and Average Children

8.6 Significance of Difference between r's of Creativity Measures and Educational Adjustment of Intellectually Gifted and Average Children
