Acknowledgments

A journey is easier when you travel together. Interdependence is certainly valuable than independence. During my research work I have been accompanied and supported by many people. It is a pleasant aspect that I now have the opportunity to acknowledge with sincere respect, my deep sense of gratitude for all those who have been instrumental in bringing this thesis to completion.

It is my profound privilege to express my extreme sense of indebtedness to my venerable Supervisor Prof. S.K. Mehta, Department of Chemistry, Panjab University, Chandigarh for providing me the perfect working conditions and continuous support. His perceptive suggestions and invaluable guidance was very exciting and encouraging for me. It has been a matter of pride and profound pleasure to have worked under his kind and able supervision. Without his generous assistance and encouragement this work would not have been materialized.

I want to express my intense appreciation to Prof. K.K. Bhasin, Professor, Department of Chemistry, Panjab University, Chandigarh. His helpful suggestions and productive condemnation have been influential in providing me the essential momentum to endeavor for gaining valuable methodical skills.

My best regards to Dr. Ganga Ram Chaudhary, Lecturer, Department of Chemistry, Panjab University, Chandigarh. His in-depth knowledge has always helped me mainly for many invigorating and informative conversations.

I also sincerely thank Prof. Paramjit Singh, Chairman, Department of Chemistry, Panjab University, Chandigarh, for providing me the requisite laboratory and other essential research conveniences. I am also thankful to all other teachers and non-teaching staff of the Chemistry Department, P.U. for their kind support.

I appreciatively acknowledge the extensive help of Prof. Michael Gradzielski, who enabled me to work in his laboratory at the Technische Universität, Berlin, Germany. I want to express my gratitude to his team as well especially Peggy and Sylvain for their warm welcome, cooperation and for the unique familiar atmosphere of their lab. It was a real pleasure for me to be there.
A positive energy and humorous environment is all we need to accomplish such an arduous task. Thanks to all my fellow colleagues especially, Gurpreet, Bhawna, Sanjay, Rishu, Ekta, Dr. Shweta, Dr. Shilpee, Bhuvnesh, Ravneet, Sakshi, Neha, Ruchi, Khushboo, Rajeev Sir, Yogesh, Shafi, Priya. A special thanks to Gurpreet, Bhawna, Rishu and Ekta for rejuvenating my fainting spirits in testing times and cheering me up with their kindly meant witticisms. A special word of thanks to Khushwinder and Nishima for their unwavering support & encouragement during all times.

Words are insufficient to verbalize my deep sense of gratitude and regards to my Nana and Nani ji who soulfully provided me their constant support and the right impetus to undertake the challenge of this proportion like all other spheres of life, for what I cannot measure but treasure. I owe my Ph.D more to them than to anyone else. My special thanks to my parents and brothers, who have always been my great friends and provide me inner strength. I find it difficult to pen down my deepest sense of indebtedness toward my mama Dharmvir, Satish and maas Suresh and Poonam. When my morals ebbed and enthusiasm waned, it was Satish and Poonam who helped me getting out of it, a feat that can never be paid back in feelings or words. To them I owe my wonderful today and dream filled future. I also intend to express my gratitude to my in-laws family for their cooperation.

Needless to mention, this thesis could not have been possibly brought to a successful culmination without the support of my husband Rajesh. I would like to thank Rajesh, without his unconditional support throughout my research tenure. I would certainly have never made it to this point.

I am also thankful to Panjab University, CSIR, New-Delhi, for the award of Junior and Senior Research Fellowship respectively. I would like to thank DST-DAAD for the award of DST-DAAAD Project Based Personal Exchange Programme (PPP)-2008.

Finally I thank the almighty whose blessings enabled me to ascend another step of my destination by accomplishing this piece of work.

(Savita Chaudhary)
