LIST OF FIGURES

2.1 Photon emission and absorption in QED.
2.2 Reduction of the weak interaction to the current x current form.
2.3 One-loop corrections to the weak decay of heavy quark.
2.4 The effective charged current and effective neutral current.
2.5 The dependence of $c_+$ and $c_-$ on the mass scale $\mu$.
2.6 The spectator diagram.
2.7 The W-emission process (external and internal).
2.8 W-annihilation.
2.9 W-exchange.
2.10 W-loop.
2.11 Elastic final state interaction.
2.12 Counting rule in the $1/N_C$ expansion.
3.1a Weak decay $D \rightarrow K \rho$.
3.1b Strong decay $\rho \rightarrow \pi \pi$.
3.1c Weak decay $D \rightarrow K \pi \pi$.
3.2a Mass dependence of center of mass momentum, decay constants and form-factors.
3.2b Breit-Wigner form of measure for $\rho$-meson.
5.1 Weak bremsstrahlung process $q_1 (p_1) + q_2 (p_2) = q_3 (p_3) + q_4 (p_4) + \gamma (k)$.
5.2 Internal radiative process.
5.3 Variation of $B (\Lambda \rightarrow n \gamma) vs b/a$ for different SU(6) breaking angle $\varphi$.
5.4 Variation of $B (\Xi^0 \rightarrow \Lambda \gamma) vs \varphi$ for different $B (\Xi^0 \rightarrow \Sigma^- \gamma)$.
5.5 Variation of $B (\Xi^0 \rightarrow \Sigma^0 \gamma) vs \varphi$ for different $B (\Xi^0 \rightarrow \Sigma^- \gamma)$.
5.6 Variation of $\alpha (\Sigma^+ \rightarrow p \gamma) vs B (\Xi^0 \rightarrow \Sigma^- \gamma)$ for different $\varphi$.
5.7 Variation of $\alpha (\Xi^0 \rightarrow \Lambda \gamma) vs B (\Xi^0 \rightarrow \Sigma^- \gamma)$ for different $\varphi$.
5.8 Variation of $\alpha (\Xi^0 \rightarrow \Sigma^0 \gamma) vs B (\Xi^0 \rightarrow \Sigma^- \gamma)$ for different $\varphi$.
5.9 Variation of $\alpha (\Xi^0 \rightarrow \Sigma^0 \gamma) vs b/a$.
5.10 Variation of W-exchange scale $l_{2q} vs b/a$.
