## CONTENTS

### CHAPTER – I: INTRODUCTION

- The problem of research    1-3
- Theoretical Consideration  4-15
- Review of studies         16-23
- Objectives of the study   24
- Hypotheses of the study   25-27
- Methods and techniques of data collection  27
- Universe of the study     27-28
- Instruments of data collection  28-29
- Analysis of data          29-30

### CHAPTER – II: DEMOGRAPHIC, SOCIO-CULTURAL AND ECONOMIC PROFILE OF THE STUDENT PHYSICIANS

- Age Composition            32-33
- Sex                        34
- Marital Status             35-36
- Place of Birth             36-37
- Place of Upbringing        38-39
- Schooling background of students  40-41
- Religious Background      42-43
- Caste Distribution of the students  44-45
- Educational Background of Father’s of the Students  45-47
- Occupation of the respondents fathers  47-49
- Respondents Father’s income background  50-51
- Family Composition         52-53
- Family kin in the medical profession  53-55
CHAPTER – III: MOTIVATION AND PERCEPTION OF STUDENTS TOWARDS MEDICAL PROFESSION

- Decision Regarding Joining the medical course
- Age at which decision was taken to join medical profession
- Motivation to join medical profession
- Perception of the students regarding admission into the medical profession
- Changes in Idealism about medical profession
- Student’s perception of the medical profession in regard to whether it will make them useful member of the society or not.
