Acknowledgements

After having compiled all the data for what seems an inexorably long time, my first impulse was to plot a bar-diagram with the names of my benefactors running along X axis and "Credit ratings" on Y axis, but I do not intend to prolong that deadening ordeal a moment longer than absolutely necessary. After keying in approximately 50,000 words in stilted style in keeping with the strictures of "THE THESIS" acknowledging my well wishers seemed a splendid opportunity.

Prof. Saroj Sharma, a multifarious and charming personality deserves my deep sense of gratitude and acclamation for being a continuous and unending source of encouragement and guidance. It has been a unique experience working under blissful guidance of a person so expert in her field. I owe a great deal to her.

It is a pleasure to acknowledge Prof. N.K. Ganguly, Prof. and Head, Deptt. of Experimental Medicine and Biotechnolgy, PGIMER, Chandigarh. He is an ocean of unending ideas, invaluable suggestions and a walking encyclopedia on who's who in Science. I am greatly indebted to him for taking out time for me from his such a busy schedule and providing infrastructure for carrying out this study.

I am extremely grateful to Dr. Sanjay Chhibber for his indulgent guidance and moral support through out the study. His guidance has gone a long way in successfully accomplishing this work.

I should like this opportunity to thank Dr. Dikshit, Chairman, Deptt. of Microbiology, Panjab University, Chandigarh for timely execution of his duties for me.

Thanks are due to Dr. Harpreet Vohra for her kind cooperation and healthy criticism. She listened to my problems, time to time, with great patience and rendered all her possible help to solve them out.

I appreciate the kindness and goodwill of those who provided material and reagents. Dr. Mishra from I.M. Tech., Chandigarh tops the list who provided HT-2 and WEHI 279 cell lines and allowed me to carry out a part of study in his lab.
Dr. Kusum Harjai deserves special thanks for being always there whenever I needed her and to whom I could bother any time with any kind of problem.

To my friends and colleagues in P.G.I., shivani, Ashish, Buvana, Neelam, Gaurav, Dr. Saffroon, Arvinder, Amrisha, Bhawna, Jaya, Vandana and Narinder, I offer not only my gratitude but also special thanks for all the small things that can only come from big hearts.

I gratefully acknowledge technical help rendered to me by Mr. Bhatia and Mr. Maini.

Words can not express the constant moral support, help and inspiration given to me by my family members. This achievement is in fact by all means credited to the combined effort by all them - my late mother-in-law, parents Anjula Raj, Anita, Deepak, Arun, Bindu, Kaku, Softy, Lofty. Swati, Madhur, Varuna and Sanniya. I can not ignore the inconvenience suffered by my husband and son because of my study. I owe immensely to them for their affection and love.

Financial help in form of JRF and SRF from council of scientific and industrial research is highly acknowledged.

Thanks are also due to Mr. Suresh Sharma, Chander Mohan, Ram Saroop and S.K. Bhatia of M/s SHAGUL GRAPHICS who ensured to give best quality of typing and acquisition processes. Without their assistance I would have been greatly incapacitated.
