ACKNOWLEDGMENTS

Almighty dwells within and works through all of us. Above all, I bow to the Almighty for showering the choicest blessing upon me and giving me the strength, courage, determination and confidence to choose the right path in life and rewarding me with the completion of this dissertation. This dissertation has got life through the collective efforts of many people whom I place higher in my life and are dear to my heart. I would like to take the wonderful opportunity to thank all these people.

First of all, I humbly acknowledge the guiding force in every soul on this earth, the Omniscient One, for granting me the opportunity to work under the able guidance of my esteemed and worthy supervisor Dr. Daisy Rani Batish, Professor, Department of Botany, Panjab University, Chandigarh. I feel immense pleasure in expressing deepest gratitude to her, for her valuable and illuminating guidance, constant motivation, support and encouragement in every step during the course of investigation that instilled in me the faith and confidence to achieve this goal, which is presented herewith. Without her immense knowledge of the subject, patience, painstaking efforts, critical evaluation of the work, editing and scrutinizing of this research manuscript, it would not have been possible for me to complete this task with least discrepancies. Besides the subject of my research I learnt a lot from her, which I am sure will be helpful for me during rest of my life in one way or the other. No words can suffice my gratitude towards her. It has been my privilege to work under her benevolent guidance.

I feel, it is often fruitful when execution of one’s endeavours is in the hands of a competent and enthusiastic academic leader like Professor R. K. Kohli, my co-supervisor, Professor, Department of Botany, Panjab University, Chandigarh. I warmly thank him for his valuable guidance and constant support. This dissertation would never have achieved its final form without his intellectual ability, valuable suggestions and encouragement. His extensive discussions and interesting explorations have been very helpful for this study. Detailed review of the thesis by sparing his valuable time, constructive criticism and excellent advice from his end during the preparation of this thesis have been of great help to me.

I sincerely owe my cordial thanks to Dr. Harminder Pal Singh, Associate Professor, Department of Environment and Vocational Studies, Panjab University, Chandigarh for making possible the realization of this study. His constant support, constructive criticism, ability to
persuade and quest for excellence had helped in many ways, for completion of this study successfully.

I am also grateful to Professor A. S. Mhawalia, Chairman, Department of Botany, Panjab University, Chandigarh for providing all the required facilities, in carrying out this study.

I am also obliged to Mr. Amarseet Singh, Senior Scientific Officer, Department of Botany, Panjab University, Chandigarh for his help and cooperation regarding use of various scientific instruments in the departmental instrument lab. I am also grateful to Dr. V. C. Nag and his group SAFI, AIIMS, New Delhi, for necessary help in getting my samples analysed by TEM. I feel immense pleasure to thank Dr. V.P. Sharma, Senior Scientific Officer, Department of Zoology, Panjab University, Chandigarh for his ever ready professional help rendered to me time to time. My indebtedness is also due to Mrs. Maninder Kaur, Scientific Officer, Centre with Potential for Excellence in Biomedical Sciences, Panjab University, Chandigarh, regarding use of various scientific microscopes fitted with cameras for photography of slides.

The help extended by my seniors Shalinder di, Anamika di, Savita di, Mukta di, Gurpreet di and Nidhi di is truly praise worthy. I owe my special thanks to all of them.

I would also like to appreciate the cooperation of all my labmates Priyanka Mahajan, Aasha, Anjana, Kirti, Surabhi, Anu, Anita, Sunayana, Amrit Bharti, Deep Shikha, Esmail sir, Neelkant sir, Saratji sir, Arvind, Harman and Gaganpreet, who always helped and supported me in completing this study successfully. My special thanks are due to my friend, Nitina Ahuja, who has been most understanding, caring and co-operative at all times and in all possible ways. I thank her, for always giving me friendly advice and able co-operation during the entire tenure of my research work as well as in compiling this manuscript.

I would like to express my warm thanks to all those authors whose work has either been consulted or quoted for the fine accomplishment of this task.

I shall be failing in my duty if I don't express my profound and sincere thanks to all the non-teaching members of the Department for their multifarious help from time to time. My indebtedness also extends to Mr. Lalit, Mr. Lallan Prasad, Mr. Ram Narayan for their help and kind cooperation during the entire course of study. My thanks are owed to many other colleagues for their help along with apologies, for those not listed.

Words are too inapt to express my reverence and gratitude towards my grandparents, Late S. Kamwash Singh Chowhan and Smt. Surinder Kaur Chowhan, for the way they brought me up despite of their increasing age and lot many other difficulties. I am indebted to them for always
trying to inculcate good mannerism and good things in me. My heartfelt thanks to their unconditional love, blessings, kindness, patience, comfort and lessons in life. No words can suffice my thanks towards them. My grandmother has been the pillar of moral support and encouragement for me throughout.

Heartfelt thanks are also due to my father Dr. Jeeininder Singh Chowhan, whose constant encouragement, support and valuable conversations always gave me the strength needed to overcome the barriers I found during my entire life as well as long period of this investigation. Without his support, encouragement and patience this thesis would not exist. Appreciations are also due to my younger brothers Parvez Chowhan, Ajaypal Singh Chowhan and niece Mannat Singh Chowhan for their love, care and faith in me. Their warm welcome at home during each weekend always helped me forget the tiredness of a hectic week. They not only made this scientific journey easier but also stood by me whenever I needed them the most.

I feel sincere gratitude to my husband Mr. Piyush Kaushal for his never ending enthusiasm, support, motivation and love that proved an inexhaustible source of strength to me. Without his untiring help and motivation in achieving my endeavours, it would have been impossible for me to complete this entire journey. Finally, last but not the least, I feel immense pleasure to thank my in-laws Sh. Ranjan Singh Kaushal and Mrs. Priya Kaushal, for showing patience during this whole period. Their constant encouragement and support helped me a lot to successfully complete this task.

I must gratefully express my thanks to Mr. Jonney and Mondeo Binding Shop for meticulous typesetting and binding of this dissertation.

All may not have been mentioned, but none is forgotten.
