ACKNOWLEDGEMENT

I am grateful to Dr. (Mrs.) S. Bambah, Reader in Health Education, Department of Physical Education, Panjab University, Chandigarh and Dr. G.S. Singh, Professor and Head of the Department of Pharmacology, Lady Hardinge Medical College, New Delhi for their guidance and help. But continuous encouragement and inspiration of Dr. (Mrs.) S. Bambah, I would have never been able to complete this work because at times I found the present study of very complex nature.

I am also thankful to Mr. N.N. Mall, Chairman, Department of Physical Education, Panjab University, Chandigarh who encouraged me from time to time to complete the work.

I have special word of thanks for Dr. D.V. Vadhera, Chairman, Department of Microbiology, Panjab University, Chandigarh for the gift of animals.

Gift of following drugs is gratefully acknowledged. But the generous supply of these drugs by the various drug companies as well as respected colleagues, it would have not been possible to undertake and conclude these studies.

1. d-Amphetamine was generously gifted by Professor P. Sen of University College of Medical Sciences, New Delhi.

2. Pemoline was gifted by Laboratories for applied biology, England and Medo-chemicals, England.

3. Phenoxybenzamine and propranolol are the gifts of Smith Kline and French Pvt. Ltd. and I.C.I., England respectively.

Harnam Singh
