Acknowledgment

Dennis Waitley said ‘It is not in the pursuit of happiness that we find fulfillment, it is in the happiness of pursuit’ and it is my privilege to acknowledge all those who made my pursuit to achieve this dream a happy one. My existence is due to the Lord Almighty and I am immensely grateful for the way he has planned my life. It is by his grace alone that this moment has come in my life and I am grateful to lord almighty for everything.

I am indebted to my supervisor, Dr Indu Pal Kaur, Professor, Pharmaceutics, University Institute of Pharmaceutical Sciences, Panjab University, for guiding me in every step of my thesis patiently and amorously. It is a privilege to work under her supervision and I thank God for giving me this opportunity. This thesis would have not been possible without her, as right from the nascent stage of my work; it was her guidance and experience that steered the research in the right direction. She has always enlightened me with her vast knowledge, creative ideas and most importantly her endorsement of positivity ('Neha always be with a smile') and spirituality has had an immeasurable effect on me. She always makes it a point to comprehend each result and gave me impetus to apply my intellect in giving proper explanations for the results, with a scientific rationale. Her approach to research problem has had a deep impact on my way of scientific thinking and for that I remain in awe of her. I am enormously grateful to her for teaching me writing skills and also for bearing my not so good attempts of presenting work. Even one session with her was good enough to get my experimental/writing or even personal life to get into right track. I read somewhere ‘Teachers are those who prepare us not only for a test but rather for the exam called life’. I feel extremely fortunate that I had the best teacher in this regard. I have gained so much professionally and personally from her bank of knowledge. She is an inspiration and will remain so for the rest of my life.

I would also like to acknowledge Dr Neeraj Khullar, ex-faculty of Department of Biotechnology for enrolling me as a Ph.D. student.

My thanks are extended to faculty of the Department of Biotechnology, Professor Jagdeep Kaur, Dr Neena Capalash, Dr Kashmir Singh, Dr Jagtar Singh, Dr Ravindresh, Dr Pooja, Dr Monika and Dr Baljinder for providing excellent working environment that gave impetus to my research project.
I am extremely grateful to Dr Kanwaljit Chopra, Professor, Pharmacology, University Institute of Pharmaceutical Sciences, Panjab University, for providing me with resources which aided in my experiments. I am extremely grateful to the support and the suggestions provided by Dr Dutta for histological studies. I am truly grateful to my senior Dr Vandita Kakkar, Assistant Professor, Pharmaceutics, University Institute of Pharmaceutical Sciences, Panjab University for all the guidance and support provided to me throughout the research work.

Thanks are also due to the clerical and technical staff of Department of Biotechnology, Ms Raj, Mr Surinder, Mr Anesh, Mr Manoj, Mr Ram Chander, Mr Rakesh and Mr Shashit for the support and help provided. A special thanks to Mr Pritam for his concern and helping attitude throughout my research work. I also acknowledge the help provided by Mr. Sanju and Ms. Mamta. I am extremely grateful to the staff of Central Animal house, Panjab University for their help and guidance especially Mr Suram Singh.

I am immensely grateful for the presence of Ritu Ma’am in my lab as my journey here began with much guidance and support from her. Thank you Ritu Ma’am for all the care, love and support. I am grateful for the guidance provided by my seniors Rohit Sir and Manoj Sir. A special and heartfelt thanks is due to Harinder Sir for always helping and guiding me at times of need. I am grateful to Vinod Sir for imparting his knowledge of animal handling. A heartfelt thank you to my seniors Sajal Ma’am, Niti di and Gaurav Sir for all the help and guidance provided. I am grateful for the help given by my labmates Alpa and Shilpa. I am extremely thankful to my juniors Keshav, Pramod, Aditi, and Diksha for always helping me and motivating me when I had zero knowledge of animal handling. I am immensely grateful to Parneet for being a pillar of support and for always motivating me whenever I retreated into shell of negativity. Thank you Parneet for being someone I could rely on always. A special thanks to Mandeep for his ever helping attitude with all my experiments concerning nanoparticles. I am truly grateful to my juniors Monica, Simar, Gaurav, Sahil, Iksheta and Harman for all their help whenever I asked for it. I am also grateful to Harvinder for all the help provided whenever required.

Life’s journey is made beautiful with friends and I am extremely lucky for the bunch of friends who have contributed to my journey so far. Thank you Anjan di, Aveet, Bhavna, Chicky, Gagan, Iesha, Jagjeet, Karnika, Mona, Nandita, Pitamber Sir, Prabhjot, Priyanka, Rrizzee, Sharan,
Surbhi, and Vanita Ma’am. I am extremely grateful to Tejpal Ma’am for being my source of unlimited research papers.

Thank you Nidhi for all the help and care. I am grateful to Aman for her ever helping attitude. I am extremely thankful to Manisha for being a pillar of support always. Thank you for your kindness and the goodness you bring to everyone’s life including mine. Thank you Gunnu for all the help and good times. I am very grateful to Adity, Amit Sir, Vibha and Virat for helping me get through the toughest times of my life.

A special thank you to ‘Simran’ for being my friend at all times of need and for always making me feel positive. Also, loads of thanks and love for always making me feel like a winner (topper) and for bringing magic into my life. At times of adversity you require strength to carry you over and especially for those times a special and heartfelt thanks to ‘Neha’. Thank you Neha for bringing cheer and smile on my face always, no matter the situation and for making me stronger and helping me get through the tough times. I am extremely grateful to my friend Vivek for being there for me always and even at times when I could not muster strength to ask for help. Loads of thank you to Yogesh Uncle, Asha Aunty, Swati di and Shaveta di for all the prayers, love, care and support.

I feel words are not enough to express my gratitude for you ‘Stuti’. I am so grateful to God for sending me an angel like you. If not for you, I would not have made it this far. Thank you is all I can say for being my strength, anchoring my life and most importantly being the wind beneath my wings. With you around it was like a family away from home.

Again words fail to express my gratitude for my family. Thank you Mummy and Papa for all the prayers, love, care and sacrifices made. I would be nothing without you. Thank you for bearing my mood swings always. Thank you Mummy for teaching me ‘try and try again, until you succeed’. Thank you papa for your belief, support, encouragement and congratulatory statements. You are and will remain my hero forever. Thank You for inspiring me and all those who come in touch with you. Thank you Kiran di for always reminding me to relax and have fun. Thank you Seema di (Dr Seema) for inspiring me time and again. Thank you Chitra di for listening to all my problems, cribbing and believing in my strength. Thank you to my little angels Tamanna, Raghav, Aadya, Keshav and Akshara for being a constant source of joy, even when it
was hard to feel so. I am so grateful for all of you and I just want to say like always ‘I carry your heart with me, I carry it in my heart, I am never without it’.

Financial grant received from ICMR, New Delhi is highly acknowledged.

I pay homage to the animals sacrificed during this study. May God grant them eternal peace.

Lastly I want to state for any errors that may remain in this work, the responsibility is entirely my own while the expertise in this study belongs to those acknowledged above.

Neha Singh
