ACKNOWLEDGEMENTS

It is a great pleasure to express my sincere gratitude to my respected, adorable teacher and supervisor Dr. V.V. Upmanyu, Reader, Department of Psychology, Panjab University. It was his constant guidance, encouragement and timely suggestions which enabled me to complete this study.

With a deep sense of gratitude, I express my sincere thanks to my esteemed teacher and supervisor Prof. S.B.S. Mann, Head, Department of Otolaryngology, PGIMER, Chandigarh, for his invaluable teaching and guidance. It is an honour to have been able to work and learn under him.

I express my sincere thanks to all my students in the Department of Audiology and Mrs. Nirmal Agnihotri for their cooperation.

I am also thankful to Anoop & Rajiv for designing and type setting of thesis on computer.

I am very fortunate that my husband, Dr. Nitin encouraged me and contributed at every stage of my thesis.

Last, but not the least, I wish to thank all my patients who volunteered themselves to make this study successful.
