ACKNOWLEDGEMENTS

No words can adequately express the debt I owe to my worthy supervisors, Prof. (Mrs.) Usha Kanwar, and Dr. (Ms.) Ravinder Jit Kaur Anand, Department of Zoology, for their dynamic supervision, competent guidance and constructive criticism in accomplishing the entire investigation. This thesis is the outcome of their esteemed guidance which is dedicated to them.

Words are difficult to find the extent of my indebtedness to Dr. Sankar Nath Sanyal, Reader, Department of Biophysics, Panjab University, Chandigarh for his encouragement through inspirational words and skilled guidance along with innumerable suggestions during the course of present investigation.

I owe my cordial thanks to Prof. S.K. Taneja, Chairman and Prof. M.S. Handa and Prof. H.S. Banyal, Ex-Chairmen, Deptt. of Zoology, Panjab University, Chandigarh for providing me the necessary laboratory facilities.

My special thanks are due to Mr. V.P. Sharma for providing me the necessary technical help and Mr. Yashpaul, Mr. Balwinder and Mr. Inder for laboratory assistance.

I have great sense of appreciation for the Ministry of Sciences, Researches and Technology of Iran Government and Indian Council for Cultural Relations (ICCR) due to supporting me with financial assistance during the course of present investigation.

I have been very lucky to have real friends, Khalid Majeed Dakhel, Harcharan Ramana, Kuldeep Rana, Kuldeep Kaushik, Amit Grover and Preveen, around who helped me and always boosted my morale and on whom I could always rely.

The blessings and co-operation of my beloved wife (Noha) and family enabled me to do justice to my work. May God bless them.

All may not be mentioned but none is forgotten.

(Mehran Arabi)
