This is perhaps the easiest and hardest chapter that I have to write. There are lots of people I would like to thank for a huge variety of reasons. It will be simple to name all the people that helped to get this done, but it will be tough to thank them enough. I will nonetheless try......

Firstly, I would like to thank my supervisor, Prof. Ranbir C. Sobti, Department of Biotechnology and Vice Chancellor, Panjab University, Chandigarh. I could not have imagined having a better advisor and mentor for my Ph.D., and without his knowledge, perceptiveness and unstinting commitment, this work would have been difficult to complete. Prof. Sobti challenged me to set my benchmark even higher, showing me that there is more to academia than the menacing mediocrity. The best advisor and teacher I could have wished for, he is actively involved in the work of all his students, and clearly always has their best interest in mind. Thank you for pushing me Sir.

My sincere thanks are due to my co-supervisors, Dr. S. C. Sharma, Reader, Deptt. of Biochemistry, Panjab University, Chandigarh and Dr. Uma Nahar Saikia, Assistant Professor, Deptt. of Histopathology, P.G.I.M.E.R., Chandigarh for their interest, advice and timely assistance.

A special gratitude is also due to Dr. F. S. Nandel, Professor, Department of Biophysics, Panjab University, Chandigarh for making mountains seem like mole-hills during the later stages of my work and providing meaningful suggestions during the writing of the manuscript.

I am thankful to the faculty and staff of the Department of Biotechnology, Biochemistry and CIL/SAIF, Panjab University for their kind support. I also wish to acknowledge my colleagues and all my friends, big and small, for their whole hearted, pleasant cooperation and generous help during all times. With reference to the corridors of academia, I would also like to extend my gratitude to the C.S.I.R. and I.C.M.R. who funded my research work.

I cannot end without thanking my family, on whose constant
Acknowledgement

encouragement and love I have relied. They mirrored back my ideas, so I heard them aloud. I am forever grateful to my maternal grandparents, whose foresight and values paved the way for a privileged education and to my parents who gently offer counsel and unconditional support at each turn of the road.

This thesis is dedicated to my mother Mrs. Ujjwal Sahrawat, without whom none of this would have been even possible. The creativity, determination and sense of joy with which she responds to life’s challenges have led me to seek this for myself. Reinforcing my spirits at some crucial junctures, putting up with my bad temper at times, she provided much encouragement throughout the largest part of this project. From her I learned to believe in my future, my work and myself. Perhaps this thesis would not have survived some of the more trying times during the process of writing up if it had not been for her unquestioning support. This thesis is a small tribute to an exceptional lady from a daughter anxious to learn and be like her. Thank you Mom.

Lastly, it is imperative to point out, that all may not be mentioned, but none are forgotten.

Thank you all
