ACKNOWLEDGEMENT

All my efforts would be futile without bowing to the Almighty God, the divine who continues to make the impossible possible.

It is both a pleasure and privilege for me, for having blessed with an opportunity to acknowledge my indebtedness and reverence to my distinguished and esteemed supervisor Prof. R. K. Kohli, DUl and Professor, Department of Botany, Panjab University, Chandigarh. His untiring supervision, outstanding knowledge, constructive criticism, thought provoking discussions, tremendous cooperation, valuable suggestions and continuous support throughout the study enabled me to complete this stupendous work. His ever helping nature, persistent encouragement and immaculate guidance have made this investigation to take the shape of thesis.

It is my pleasure to express most sincere thanks to my co-supervisor, Prof. Daisy R. Batish, Professor, Department of Botany, Panjab University, Chandigarh, whose continuous encouragement, benevolent attention, invaluable guidance and critical evaluation was the greatest source of inspiration throughout this course of study. Her asset of patience and perseverance paved a path for materialization of this manuscript. I owe deep gratitude to her for constant involvement.

I warmly thank Dr. Harinder Pal Singh, Assistant Professor, Department of Environment Studies, Panjab University, Chandigarh, for the help rendered whenever it was required. I thank him for his continuous support, valuable suggestions, constructive criticism and encouragement which have certainly made the difference.

I am obliged to Prof. A.S. Ahluwalia, Chairman, Department of Botany, Panjab University, Chandigarh, for providing me all the facilities required to complete this research work.

I am grateful to Dr. Shalinder Kaur for her kind assistance, warm support and indispensable help throughout my thesis work that has been solicitous and instrumental in
my endeavour. I will always look up to her for her humble attitude and kind help in every possible way.

I take this opportunity with much pleasure to thank Dr. V. P. Sharma, Senior Scientific Officer, Department of Zoology, Punjab University, Chandigarh for his untiring help at all points of time.

My profound thanks are due to all my labmates for their advice, support, encouragement and suggestions that made the task easier. I am also thankful to Sh. Gundev S. Mongia for helping me to identify plant specimens.

Finally, this thesis would not have been possible without the confidence, unconditional and enduring love, morale boosting and support of my loving wife Mrs. Faezeh Daei. Without her encouragement and understanding it would have been impossible for me to finish this work. My special gratitude is due to my daughter, Ghazal and son, Alireza who have always shown patience and cooperation.

Last but not the least, I would like to thank everyone who has helped to make this thesis possible.
