ACKNOWLEDGEMENTS

The author expresses his gratitude to his supervisors, Prof. I.C. Pande, Ph.D. (London), F.I.A., former Director and Head and Dr. A.K. Prasad, Ph.D. (Prague) of the Centre of Advanced Study in Geology, Panjab University, Chandigarh, for their able and inspiring supervision as well as encouragement during the course of present work.

A cordial gratitude and sincere thanks are due to Prof. E.S. Tewari, Director and Head, Centre of Advanced Study in Geology, Panjab University, Chandigarh, for his encouragement, inspiration, helpful criticism and providing necessary facilities for the work.

Sincere thanks are due to Drs. H.J. v.d. Hul and Ir. S. Dijkstra of Technical University of Delft and I.T.C. Delft (Netherlands) for their help and permission to carry out the trace element analysis in the laboratory of Mijnbouwkunde, Technical University of Delft (Netherlands) during the author's stay there in 1973-74 under Netherlands Government Fellowship.

The author gratefully acknowledges the unflinching help rendered by Dr. S.P. Kapila at the various stages of the work. Grateful thanks are due to Prof. M.N. Saxena, D.Sc. and Prof. V.J. Gupta, D.Sc. for helpful discussions, and to Dr. B.K. Das for the help during chemical analyses of rocks for the major elements. Grateful acknowledgements are also due to all the colleagues at the Geology Department for their help. Particular appreciation is due to Mr. A.K. Wangu for his help. Heartfelt thanks are due to Messrs G.D. Sharma, Hardyal Singh, Photographer and M.C. Mankoo, Artist, for their co-operation and assistance.

Financial assistance from the C.A.S. in Geology, P.U., Chandigarh, for field work is gratefully acknowledged.

Janwant Singh Jiwan
Lecturer
C.A.S in Geology, P.U. Chandigarh.
