Acknowledgements

By the grace of god I have reached this opportunity to thank all those who have been instrumental in bringing this thesis to completion.

It is my heartfelt pleasure and sagacious sense of gratitude and admiration to offer my humble and sincerest thanks towards my esteemed teachers and supervisors, Dr. C. Raman Suri, Institute of Microbial Technology and Dr. M. L. Garg, department of biophysics, Panjab university for their precious suggestions, academic excellence, incisive criticism and ineffable faith during the course of this study, which impelled me to work towards my goal.

I am grateful to Dr. G Sahni, Director, Institute of Microbial technology and Dr S.N. Sanyal, Chairman, Department of Biophysics, Panjab University for providing excellent research facilities and administrative support. I also have a sense of deep gratitude for Dr. A Ghosh, former director, Institute of Microbial technology.

I will forever be indebted to Dr. Naresh K. Sahejpal, for without his uncompromised support and help, I would not have been able to begin what I am about to conclude.

Dr. Manoj Raje and Dr. Grish.C Varshney will always have a special place in my heart, for their constant scientific criticism, inputs and discussions that shaped this study to its present form.

I owe my thanks to Dr. J Agrewala, Dr R Kishore, Dr. Balvinder Singh and Ms. Aarti for guiding me through their areas of specialization and helping me seek answers to my ever emerging problems during the course of this work.

I wish to express my thanks to other members of the project, whom I worked with, especially to Dr. Jasdeep Kaur, Mr. Satish Saha, Ms Pooja Khanna and other whose constant help brought this project to a successful conclusion. Without Robin preparation of this manuscript would have been just half as fun and half as good without his constant suggestions.

I must put on records my deep sense of appreciation and gratitude for encouragement and moral support extended by my friends Harpreet Kaur, Arvind, Sumit, Krishnamurthi, Nariender and Vinod with whom I used to have solace in hard times, though not necessarily in the order of their names mentioned.

I was a nice feeling to have, Biju, Lakshmi, Sanjay, Dweepayan, Jagpreet, Sankalp, Rekha, Sharanjot, Vandana, Sukhwinder, Aarti and Simrat around for all the good reasons. I am thankful to Dr. Neeraj Khatri and Dr. Abhay Pandey for making the environment personal to work in.

Expert technical help from Mr. Desraj Agnihotri, Mr. Ramesh Sharma, Mr. Anil Thiophilus, Mr. Sagar and Mr. Sameer during this course is greatly acknowledged. Things would not have run so smooth for me without their help.
I owe my special thanks to my forever friends Kapil, Sanita, Neelaabh, Rahul Ajit, Anshul, Vikas, Ashok and Jyoti for all their encouragement and best wishes.

One rarely gets chance to have multiple personality groups, luckily I got to have it with Dr. Sunil Dhir, Deepak Wadhawan, Kuldeep Rana and Ashish Agarwal to fool around from my university college days and memories to recall from an era bygone.

I would like to thank the scientific, library and administrative staff at IMTECH and Panjab University for providing prompt help in anything required. The financial help provided by Department of biotechnology, New Delhi is duly acknowledged.

I find it difficult to verbalize my deepest sense of indebtedness to my parents, who suffered while I traversed the path of knowledge, providing me with constant inspiration to go ahead in all my endeavors. My younger brother Vishal who recently got wedded to Pooja, for their boundless love and support that kept me going to complete this venture.

I avail this rare opportunity to express my heartfelt appreciation of my wife Meenakshi and my lovely little daughter Vasundhara, who with their constant moral, inspirational and patient attitude towards life just made me feel complete.

Lastly I would like to apologies to all those who I have not mentioned by name but have asked them favors without inhibition whenever, whatsoever required. I am indebted to them for many ways they have helped me during the course of this study.
