ACKNOWLEDGEMENTS

Words fail me when it comes to expressing my deep gratitude to my guide, S. Gurbakhsh Singh Sandhu, Reader; Department of Physical Education, Panjab University, Chandigarh; but rarely does an opportunity like this comes to thank one's mentor. And I do not wish to let it go. Sandhu Saheb has not been just a registered guide but a constant source of inspiration. The perspective provided by him to this work has been of crucial importance. His suggestions had many a time seemed minor. In retrospect, I realise that those suggestions have greatly enhanced the worth of my thesis. They have besides made me less ignorant and more humble. It may seem hackneyed but closest to the truth that this study has been made possible by S. Gurbakhsh Singh Sandhu.

I owe a different kind of debt, deeply felt, to Dr. (Mrs.) S. Bambah, Professor at the Department of Physical Education, Panjab University, Chandigarh. Her analytical approach and constant encouragement have been of invaluable help.

Sincere thanks are due to Dr. Minhas, Reader, Department of Psychology, Panjab University, Chandigarh for rendering valuable assistance at the more critical stages of this study.
I wish to express my gratitude to Dr. Ajmer Singh, Director of Sports, P.U., Chandigarh, for permitting me to conduct extensive experiments on the University athletes during the coaching camps.

I also wish to thank all the athletes, for giving me their time and patience during the experiments.

My thanks are due to Mr. Kamal Kant Sharma and Mr. R.S. Brar, lecturers in Physical Education at DAV College and Govt. College, Sector-40, Chandigarh; respectively, for their whole-hearted assistance throughout this study.

Lastly, I wish to acknowledge the understanding and sympathy supplied by my wife Mrs. Savitri Mann and by my two sons Bhupendra Mann, Amanendra Mann. My family gave me strength by putting up with certain neglect and inconvenience which now seems I could have avoided.

( NASIB SINGH MANN )
