ACKNOWLEDGEMENTS

Kind words can be short and easy to speak, but their echoes are truly endless.

Mother Teresa

I cannot possibly list all the people who have been instrumental in helping me through these very difficult years. Nevertheless, I am making my utmost effort to enumerate at least a few of them.

First and foremost, I am deeply grateful to my supervisor Professor Dr.K.Govinda Rajulu, for his continuous support in the Ph.D. program. He showed me different ways to approach a research problem and the need to be persistent to accomplish any goal. His wide knowledge and his logical way of thinking have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present thesis.

I’d like to give my sincere thanks to my honorific supervisor, Dr.A.V.S.S.Kumara Swami Gupta, Professor, Department of Mechanical Engineering, JNTUH Hyderabad, who accepted me as Ph.D. student without any hesitation when I presented him my research proposal and introduced me to Prof.K.Govinda Rajulu. Thereafter, he offered me so much advice, patiently supervising me, and always guiding me in the right direction. I’ve learned a lot from him, without his help I could not have finished my dissertation successfully. It is not sufficient to express my gratitude with only a few words.
I am grateful to the authorities of Jawaharlal Nehru Technological University Hyderabad, Research & Development Cell and Mechanical Engineering Department for their help and co-operation to complete my research work.

I am thankful to Management of Sri Ramananda Tirtha Institute of Science and Technology, Nalgonda, Andhra Pradesh, for availing themselves to me. I also thankful to Management of this college for provided one day holiday per week to me to do my research work.

I owe my most sincere gratitude to Dr. Maganti Janardhana, Associate Professor, Department of Civil Engineering, JNTUH, Hyderabad. He is the one who gave me heart full hospitality in IIT Madras, Chennai and also helped me to do literature survey in the IIT Chennai library.

I am thankful to Smt. K. Shymala, Research Scholar, Computer Science and Engineering, IIT Madras, Chennai for her help in getting latest journals from IIT Chennai library.

I am also thankful to Dr. T. Srinivas, Professor, School of Mechanical and Building Sciences, Vellore Institute of Technology, Vellore, Tamilnadu, for his help in the development of steam properties.

In Particular, I wish to express my sincere thanks to Mr. Padala Veera Venkata Surya Prasad, for his constant help in all aspects of my life and encouragement for my achievement.

I’m thankful to Sri. M. Chandra Sekhar Rao and Smt. K. Nirmala for their constant support and encouragement.
I’m very grateful to my parents Sri. Indigibilli Surya Rao and Smt. Late Indigibilli Achiyamma. My mother always lets me know that she is proud of me, which motivates me to work harder and do my best.

It is very difficult to find the right words to express my gratitude towards my wife, Susheela and my son, Aaditya. Their support without any complaint or regret has enabled me to complete this Ph.D. thesis. I extend my very sincere and special thanks to the two of them for their love, understanding, support, endless patience, tolerance during the writing of this thesis and encouragement when it was most required.

And last, but certainly not least, my sincere thanks to all people who have helped directly or indirectly towards the completion of this thesis.

Above all, I thank God for everything.

Indigibilli Satyanarayana
