

Acknowledgements

I deem it a pleasure to express my deep sense of gratitude to my supervisor and mentor Prof. Rupinder Tewari for his sustained kindness, understanding and cooperation during the course of this work. He inspired my best efforts and meticulously guided this work to completion. I am indebted to him for giving me a research problem of my interest and immense scientific value. The faith he reposed in me and his scientific acumen guided me through the thick and thin and will be my source of inspiration for years to come.

I use this rare opportunity to sincerely thank Dr. Pawan Sharma, Senior Scientist, Immunology Group, International Centre for Genetic Engineering and Biotechnology, New Delhi for allowing me to work in his laboratory. I owe a lot to him for taking the pain of personally training me and instilling in me the belief to be an achiever. He is a constant source of motivation and I have continuously benefited from his magnanimity and generous advice.

I wish to express my heartfelt thanks to Dr. Rakesh Vohra, Scientist F, Institute of Microbial Technology, Chandigarh for his unwavering help and support during this work. His useful suggestions, tips and encouragement as well as his involvement with this work were instrumental to its success.

I am highly thankful to Prof. Akhtar Mahmood, Dept. of Biochemistry, Panjab University, Chandigarh for his kind help and support right from the day I entered the campus of this university. He opened up a whole new world for me by introducing me to Prof. Tewari.

My sincere thanks to Prof. Sobti, Chairman, Department of Biotechnology, for providing the requisite facilities in the department. The teaching faculty and non-teaching staff of the department are sincerely thanked for making my stay in the department a memorable one.

My labmates at I.C.G.E.B, Niladri and Sandeep deserve special mention for their creative inputs during the experimental phase.

I thank my friends and labmates Amit, Menaka, Alka, Vani, Kunzes, Phulan, Onkar and Jaswinder for their sustained cooperation. Bassam was a friend in need and helped me indefatigably in everything. I had the privilege of never hearing "no" from him whenever I needed a favor. My special thanks to Rajan for helping me in the writing of this thesis.

I wish to acknowledge my friends Majid, Hesam and Ali for their comradeship. Azhar, Saif, Puneet, Samar and Subhash provided succor at all times. I thank them sincerely.

I wish to also thank the University Grants Commission, Ministry of Human Resource Development, Government of India, who supported me during my Ph. D in the form of Junior and Senior Research Fellowships.

My wife Iram is the epitome of care and understanding. She is the driving force and inspiration behind everything I do; her support and understanding never elude me.

I wish to express my heartfelt appreciation to my parents, sister, brother-in-law, brothers, sister-in-laws, nieces, nephews and my in-laws whose selflessness, openmindedness, unwavering support and monumental patience are my greatest possessions.

The Panjab University community has been very hospitable and kind. If I don't list them all, it is not for lack of gratitude but for lack of space. To them and to numerous others who helped along the way, I am grateful.
