

LIST OF TABLES

Table No.	Description
2.1	Current TB drugs and their targets
2.2	<i>M. tb</i> genes involved in TB drug resistance
3.1	List of chemicals, reagents etc. and their sources
3.2	Bacterial strains and plasmids used in this study
4.1	Kinetic parameters of recombinant <i>M. tb</i> ASD
4.2	Determination of pH optimum of <i>M. tb</i> ASD
4.3	Determination of temperature optimum of <i>M. tb</i> ASD
4.4	Theoretical pI and molecular weights of ASD from different bacteria including <i>M. tb</i>
4.5	Amino acid composition of ASD enzymes of <i>M. tb</i> and eight other bacteria
5.1	Targets for drug design against TB
