CONTENTS

Preface (Page 1)
Abbreviations (Page 2)
List of Tables and Figures
Executive summary (Page 6-10)

Chapter 1: Introduction (Page 11-15)

1.1 Wastewater in Dubai (Page 12)
1.2 Motivation for the study (Page 12)
1.3 Aim of the study (Page 14)
1.4 Objectives (Page 14)

Chapter 2: Review of Literature (Page 16-51)

2.1 Introduction to Wastewater Treatment (Page 17)
   2.1.1 History and Composition of Domestic wastewater (Page 17)
   2.1.2 Activated Sludge Process (Page 19)
   2.1.3 Components of ASP (Page 22)
   2.1.4 Role of bacteria in Activated Sludge Process (Page 26)
      2.1.4.1 Food-to-Microorganism Ratio (F/M) (Page 27)
      2.1.4.2 Oxygen uptake rate (Page 29)
      2.1.4.3 Formation of flocs (Page 29)
      2.1.4.4 Filamentous Bacteria (Page 31)
         a) Filamentous Bulking (Page 32)
         b) Foaming (Page 36)

2.2 Dubai Sewage Treatment Plant (DSTP) (Page 38)
   2.2.1 Treatment Stages (Page 39)
   2.2.2 DSTP Fact sheet (Page 42)

2.3 In-situ Detection Technique (Page 43)
   2.3.1 Ribosomal RNA based Detection (Page 44)
   2.3.2 Hybridization (Page 45)
   2.3.3 Advantages of FISH (Page 48)
   2.3.4 Applications of FISH in Wastewater treatment plants (Page 49)

Chapter 3: Microscopic Survey of Filamentous Bacteria in DSTP (Page 52-75)

3.1 Introduction (Page 53)
3.2 General description of various filamentous bacterial groups detected in the activated sludge sample (Page 54)

3.2.1 Sheathed Bacteria (Page 54)
3.2.2 Gliding bacteria (Page 54)
3.2.3 Actinomycetes (Page 54)

3.3 Materials and Methods (Page 55)

3.3.1 DSTP Operational Parameters (Page 55)
3.3.2 Sample collection (Page 55)
3.3.3 Identification of filamentous bacteria (Page 55)
3.3.4 Filament abundance (Page 56)
3.3.5 Filament count (Page 57)

3.4 Results and Discussion (Page 59)

3.4.1 General operational conditions of DSTP plant (Page 59)
3.4.2 Identification based on morphological characteristics (Page 60)
3.4.3 Nocardioform actinomycete (Page 63)
3.4.4 Sulfur metabolizing filaments (Page 67)
3.4.5 Shpaerotilus and other filament types (Page 67)

Chapter 4: Isolation and Characterization of Filamentous Bacteria from DSTP (Page 76-111)

4.1 Introduction (Page 77)

4.2 Materials and Methods (Page 81)

4.2.1 Sampling (Page 81)
4.2.2 DSTP Wastewater Characteristics (Page 81)
4.2.3 Inoculation (Page 83)
4.2.4 Isolation and Cultivation (Page 83)
4.2.5 Characterization of Isolates (Page 85)
4.2.6 Staining characteristics (Page 85)
4.2.7 Effect of Temperature and pH on the growth of Isolates (Page 87)
4.2.8 Growth on various sugar and substrate groups as Carbon Source (Page 87)
4.2.9 Antibiotic sensitivity testing (Page 88)

4.3 Results (Page 88)

4.3.1 DSTP Activated sludge characteristics (Page 88)
4.3.2 Isolation of filamentous bacteria (Page 89)
4.3.3 Morphological Characterization of Isolates (Page 92)
4.3.4 Biochemical characterization (Page 95)
4.3.5 Growth on various temperatures and pH (Page 95)
4.3.6 Acid reaction (Page 99)
4.3.7 Susceptibility to antibiotics (Page 100)

4.4 Discussion (Page 107)

Chapter 5: Characterization of microbial community in activated sludge by Fluorescence In situ hybridization technique (Page 112-142)
5.1 Introduction (Page 113)

5.2 Objective of the study (Page 115)

5.3 Materials and Methods (Page 116)
  5.3.1 Dubai STP (Page 116)
  5.3.2 Sampling (Page 117)
  5.3.3 Fluorescence In situ hybridization (Page 117)
    5.3.3.1 Fixation (Page 118)
    5.3.3.2 Coating of slides (Page 119)
    5.3.3.3 Dehydration and lysozyme treatment (Page 119)
    5.3.3.4 Hybridization (Page 120)
    5.3.3.5 Washing (Page 120)
    5.3.3.6 Viewing of slides (Page 121)

5.4 Results and Discussion (Page 123)
  5.4.1 Optimization of oligonucleotide probes (Page 123)
  5.4.2 Microbial community Profile in activated sludge system of Dubai STP (Page 125)
  5.4.3 Populations detected (Page 128)
  5.4.4 FISH based detection of Nocardioform actinomycetes pure cultures in Dubai STP (Page 137)

5.5 Conclusion (Page 141)

Chapter 6: Overall Conclusions and Recommendations (Page 143-150)

6.1 Conclusions (Page 144)

6.2 Recommendations for future studies (Page 148)

References (Page 151-167)

Appendices: (Page 168-195)
  1. DSTP operational parameters (Page 169)
  2. Filament counting (Page 170)
  3. R2A Agar Medium (Page 172)
  4. CGYA Medium (Page 173)
  5. TYGA Medium (Page 174)
  6. Gram Staining (Modified Hucker Method) (Page 175)
  7. Neisser Staining (Page 176)
  8. PHB Staining (Page 177)
  9. Crystal Violet Sheath Staining (Page 178)
 10. Sulfur Oxidation Test (Page 179)
 11. Test Procedures for Biochemical Characterization (Page 180)
 12. Protocol for performing FISH (Page 188)
 13. Simplified Dichotomous key for identification of filamentous bacteria (Page 192)
 14. Phylogenetic assignment of filamentous morphotypes from activated sludge (Page 193)
 15. FISH Analysis- Calculation method (Page 194)
 16. FISH Analysis- Numerical results (Page 195)
