PREFACE

This thesis is the final documentation of the work done towards my Ph.D program from April 2005 until July 2009. The study was supported by Manipal University, Dubai campus and Dubai Sewage Treatment Plant. The study has been initiated as part of my professional affiliation with ETA-Net, Dubai and Manipal University Dubai campus.

A part of the study was accepted for publication and was presented (oral and poster) at international symposia.

- Faheem, S.M. and Khan, M.A. A study on filamentous bacteria in activated sludge process of sewage treatment plant in Dubai, Accepted for oral presentation, 1st International joint Conference on Materials Science & Nanotechnology and Biotechnology, 4-6 January, 2009, Cairo, Egypt
