

C O N T E N T S

	<u>Page</u>
<u>General Introduction</u>	1-39
Carbon-oxygen surface complexes	3
Carbon-nitrogen surface complexes	6
Carbon-halogen surface complexes	6
Carbon-sulphur surface complexes	8
Scope of the present work	17
Bibliography	21
<u>Formation and Properties of Carbon-sulphur</u>	40-131
<u>Surface Complexes</u>	
Chapter I : Formation of carbon-sulphur surface complexes	40-75
Chapter II : Stability of carbon-sulphur surface complex. Part I. Decomposition of the complex under the action of various heat treatments	76-92
Chapter III : Stability of carbon-sulphur surface complex. Part II. Recovery of combined sulphur on treatment with oxidising solutions	93-102
Chapter IV : Effect of carbon-sulphur complex on surface properties of charcoal	103-121
Chapter V : Effect of combined sulphur on sodium azide-iodine reaction	122-131
<u>Experimental</u>	132-148
Preparation of charcoals	132
Evacuation of charcoal at different temperatures	133
Estimation of surface oxygen and hydrogen . . . complexes.	134

Sulphurisation of charcoal	135
Estimation of combined sulphur	137
Interaction with aqueous bromine	138
Recovery of combined sulphur		
i) Heating in vacuum	139
ii) Heating in a current of nitrogen, carbon dioxide or hydrogen		140
iii) Treatment with different oxidising solutions		142
Measurement of densities	142
Base adsorption	143
Acid adsorption	143
Measurement of pH value	143
Measurement of vapour adsorption	144
Adsorption of hydrogen sulphide gas	145
Sodium azide-iodine reaction in the presence of charcoal		146
References	148
Summary	149- 154
