Page Nos.

Chapter-1 1-30
INTRODUCTION

Chapter-2 31-86
REVIEW OF LITERATURE
2.1 REVIEW OF RELATED LITERATURE 31-80
2.2 OVERVIEW 81-83
2.3 NEED OF THE STUDY 83
2.4 OBJECTIVES 84
2.5 HYPOTHESIS 85-86

Chapter-3 87-92
METHODOLOGY AND DESIGN OF THE STUDY
3.1 EXPERIMENTAL DESIGN 87
3.2 METHOD AND PROCEDURE OF PHASE-I 87-89
3.2.1 Sample 87
3.2.2 Material 87
3.2.3 Scoring 88
3.2.4 Procedure for anxiety scores based grouping 88
   a. Anxiety based grouping of female subjects 88
   b. Anxiety based grouping of male subjects 88-89
3.3 METHOD AND PROCEDURE OF PHASE-II 89-91
3.3.1 Sample 89
3.3.2 Material Used 89
3.3.3 Description of the conditions 90
   A. Feedforward Conditions 90
a. ‘No Tone’ Feedforward Condition (b₁) 90
b. ‘Soothing Tone’ Feedforward Condition (b₂) 90
c. ‘Ambulance Tone’ Feedforward Condition (b₃) 90

B. Execution Contingencies of Task Complexity 90
   a. Task complexity level 1 (c₁) 90
   b. Task complexity level 2 (c₂) 90
   c. Task complexity level 3 (c₃) 90

3.3.4 Procedure 91
3.3.5 Scoring 91

3.4 Statistical Analysis 91

Chapter-4

RESULTS AND DISCUSSION
A. Description of data 93-104
B. Main effects of ANOVA 105-126
   1. Role of Anxiety 107-114
   2. Role of Feedforward 115-120
   3. Role of Task Complexity 121-127
C. Interaction effect of ANOVA 127-166
   1. Anxiety x Feedforward 127-135
   2. Feedforward x Task Complexity 135-143
   3. Anxiety x Task Complexity 143-151
   4. Anxiety x Feedforward x Task Complexity 152-166

Chapter-5

SUMMARY OF THE RESULTS 167-171
REFERENCES 171-232
