ACKNOWLEDGEMENT

There is always a sense of gratitude which one expresses to others for the help and needed services they render during all phases of life. I really wish to express my gratitude towards all those who have been helpful to me in getting this Dissertation writing to successful end.

I consider myself highly privileged and very lucky that I had the opportunity to work under the guidance of Dr. M.L. Sharma, Professor Emeritus, Panjab University, Chandigarh, working under his stewardship made me understand why we in India place our teachers ahead of the Gods, his example will always be the guiding light for me not just an ideal teacher but also as a human being par excellence. His unstinted support is the primary reason for the completion of this work.

I am extremely grateful to my respected co-guide Dr. Richa Puri, Professor, Department of Botany, Panjab University, Chandigarh, for her constant encouragement, timely advice and able guidance throughout my work.

I express my profound gratitude to Dr. P. Tiwari, Professor, Department of Zoology, Panjab University, Chandigarh, for her high quality inputs in this work.

I am thankful to my lab mate and colleague Mr. Nitin Kumar Sharma, Assistant Professor, Department of Botany, Government Post Graduate College, Dhallara (Himachal Pradesh), for his constant help and co-operation in all aspects of this work.
I would like to take this opportunity to thank some people who are my support in every work, including this work. Firstly, my parents as without their constant encouragement and at times affectionate prodding this work would not have been possible. The other person is my wife Dr. Neeru who has been constantly involved in this work and helped me every way possible. Last but not the least my two kids who have been very patient and understanding throughout this long period.
