ACKNOWLEDGEMENTS

Journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of valuable years of work whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

After God the very first person, to whom I extend my utmost gratitude, is architect of this project Late Professor D.P. Jindal. Without his creative wizardry, none of the exquisite of this project would have come into existence. Though he was not present veritably throughout this project, but his solistic presence with me every moment always imbued in me the zeal to work harder. Today I take opportunity to bow my head to pay tribute to my special mentor and wish to enunciate that Sir, you will remain alive forever in my heart as a synonym of knowledge, hard work and principles.

My heart is brimful of celestial bestowal for my esteemed teacher, my guide Dr. Ranju Bansal, Senior Lecturer (Pharm. Chem.), University Institute of Pharmaceutical Sciences, Punjab University, Chandigarh. Her untiring and seemingly unlimited support, her rational persona, focused guidance, constructive criticism and above all, her availability to me both when I was delighted with the research and when I was despaired of it, instigated me in putting my hundred percent efforts. During these years I have known Dr. Bansal as a sympathetic and principle-centered person. Her overly enthusiasm and integral view on research and his mission for providing 'only high-quality work and not less', has made a deep impression on me. I owe her lots of gratitude for having shown me this way of research. She could not even realize how much I have learned from her. I am really glad that I have come to get know Dr. Ranju Bansal in my life. Her effervescent personality has made this experience all the more enjoyable for which I am greatly appreciative. She will always remain constant support, stimulus and foil for me. My thanks are also due to her family, who sacrificed their precious moments of togetherness for my sake.

The Senior Research Fellowship of Council of Scientific and Industrial Research (CSIR), New Delhi and Junior Research Fellowship of University Grants Commission (UGC), New Delhi is gratefully acknowledged.

I wish to acknowledge Prof. O.P. Kataria, Chairman, University Institute of Pharmaceutical Sciences, Punjab University, Chandigarh, Professor T.R. Bharadwaj and late professor A.K. Singla (former Chairman, UIPS, Punjab University, Chandigarh) for providing congenial working atmosphere and excellent laboratory facilities. I am also thankful to all the faculty members, especially Dr. Poonam Pipani, Senior Lecturer (Pharm. Chem.), Dr. Anupam Sharma, Reader (Pharmacognosy) and Prof. V. R. Sinha (Pharmaceutics) University Institute of Pharmaceutical Sciences, Punjab University, Chandigarh for the constant encouragement and unwavering support.

The technical support and cooperation extended to me particularly by Mr. Avtar Singh (Scientist, RSIC), Mr. Jagtar Singh (Scientist, RSIC), Mr. Ravinder, Mr. Dhruv Dev (purchase officer), Mr. Kishori Lal, Mr. Sharwan, Ms. Ranjit Kaur (Scientist, UIPS), Mr. Mangu Lal (Senior technical officer), Mr. Sethi, Mr. Shadi Lal and Mr. P.D. Chaudhary (Librarian) is respectfully acknowledged.
Special acknowledgements are due to Dr. Rosalia Carron, Professor of Pharmacology, Campus "Miguel de Unamuno", Salamanca, Spain for carrying out cardiotonic and vasodilatory activity of our compounds, Prof. Alan Harvey, Director, SIDR, University of Strathclyde, Glasgow, U.K. for providing hydralazine hydrochloride and also helping in performing PDE3B activity, Dr. V. Padmanathan, Lederle lab, USA for free sample of 2-hydrazino-2-imidazoline hydrobromide. I am again thankful to Dr. Ranju Bansal for carrying out PDE3B activity of our newly synthesized compounds at SIDR, University of Strathclyde, Glasgow, U.K. during her commonwealth fellowship tenure.

I also take the opportunity to register my heartfelt admiration for Jindal mam, Shailly-Sujon-Aarush, Sheeta and Gouri for their benevolent affection and encouragement. I will respect and cherish my association with them throughout my life.

Today is the perfect occasion to admit that having Annu-Sameer Uday Singh, Avind Bhata, Sheetal, R. Vijay Kannan, Neenaj-Benu for my friends is undoubtedly one of the best things that ever happened to me. In good times, their enthusiasm added to my joy and in troubled times, they knew just the perfect way to show they care. I extend my bottled up emotions to Priyanka Jain, Gaurav Narang, Aman Trehan, Senthil, Rajeev, Neelima, Ruchi, Ujwal Chhabra, Gulshan, Ashwani Bhatia, Navneet Turkay, Sunil, Sandeep, Dr. Suresh, Dr. Mohane Coumare, Manu, are gratefully acknowledged. I thank them all for alleviating my morale during hard times and making this tenure thoroughly an enjoyable and memorable one. I also wish to express my gratitude to my juniors especially Naifin, Sunil Kumar, Mamta, Ruchika, Amrit, Parveen and Navjot.

Sometimes, words are too reticent to mark one’s inward feelings and here I am experiencing the same. I am actually falling short of words to express my deepest sense of appreciation for my dear family, I know, mere “thanks” is just too small a word but still I am making an effort to eulogize them for being there every moment, extending their unconditional love and support, patiently listening my endless talks related to research and my work (though not really getting), filling in me the determination to attain the heights, and uplifting my morale during testing times. All I can say that what I am today is just because of them and I owe it all to them. Angelic smiles of my nephew, Sushen, Aadesh and niece, Mallika, Bhavya and Prachi made me feel delighted even in the hours of dejection. I thank God for being blessed with such a wonderful family.

Last but not the least I wish to say ‘Thanks’ to my beloved wife Amita who is a constant source of inspiration and love for all the support that she gave me during the years I have been working on this thesis, especially all the holidays that she arranged to give me time to write, to think, and to talk to her about this subject. Mere words can not express her contribution in my life, specially gifting me my sweet little daughter Bhagya, who has provided the most joyful dimension to our life mission. This is to these dear ones I lovingly dedicate this thesis.

Dinesh Kumar
