LIST OF TABLES

Table No. Description Page
1 Details of Results of High and Higher Secondary classes for the years 1978, 1979, 1980 and 1982 10
2 Defining Features of Approaches to Learning 30
4.1 Sample Distribution 105
4.2 Average Time spent on the Tests 11
4.3 Coding system for different variables used in the study 11
5.1 Means, SDs, SK, KU and F values of ACH and DIQ to test the normality and linearity of their score distributions for TS HAs, AAs, and LAs. 122
5.2 Means, SD, SK, KU, and F values to test the normality and linearity of 35 independent variables for TS, AAs, AAs, and LAs. 125
6 Means, SD, and t values for Total Sample (N=125), High Achievers (N=198), Average Achievers (N=329), and Low Achievers (N=198) on each of the 37 variables 160
7 Means, SDs, and t values for Science Students (N=219) and Arts Students (N=516) belonging to the High-, Average-, and Low-Achieving Groups on each of the 37 Variables. 167
8 Means, SD, and t values for males (N=412) and females (N=323) belonging to the High-, Average-, and Low-Achieving
Groups on each of the 37 variables

Means, SD, and t values for ....
Indian Students (N=544), and
African Students (N=191) belonging
to high-, average-, and low-
achieving groups on each of
the 37 variables.

Means, SD, and t values for ....
High-,Average-, and Low-
Achievers on 37 Measures
compared at different levels
of intelligence:

Correlation Coefficients ....
between Intelligence Measures
and Academic Achievement
(CRN) for Total sample (TS, N
=735), High- Achievers (HAs,
N=339) and Low-Achievers (LAS,
N =198)

Stepwise Multiple Regression ....
of Styles of Learning
Variables, Locus of control,
Achieving Motivation, and
Intelligence Measures with
Academic Achievement for the
Total Sample (N=735).

Stepwise Multiple Regression ....
of Styles of Learning
Variables, Locus of Control,
Achievement Motivation, and
Intelligence measures with
Academic Achievement for the
High-Achievers (N=198).

Stepwise Multiple Regression ....
of Styles of Learning Variable,
Locus of Control, Achievement
Motivation, and Intelligence
Measures with Achievement for
Average- Achievers (N=339).

Stepwise Multiple Regression ....
of Styles of Learning Variables, Locus of Control,
Achievement Motivation, and Intelligence
Measures with
Academic Achievement for Low-Achievers (N=198).

13.1 Correlation Matrix (37*37) for the Total Sample (N=735).

13.2 Principal Axes (Original) Factor Matrix for the Total Sample (N=735).

13.3 Varimax (Rotated) Factor Matrix for the Total Sample (N=735).

13.4 Correlation Matrix (37*37) for the High-Achievers (N=198).

13.5 Principal Axes (Original) Factor Matrix for the High-Achievers (N=198).

13.6 Varimax (Rotated) Factor Matrix for the High-Achievers (N=198).

13.7 Correlation Matrix (37*37) for the Average-Achievers (N=339).

13.8 Principal Axes (original) Factor Matrix for the Average-Achievers (N=339).

13.9 Varimax (Rotated) Factor Matrix for the Average-Achievers (N=339).

13.10 Correlation Matrix (37*37) for the Low-Achievers (N=198).

13.11 Principal Axes (original) Factor Matrix for the Low-Achievers (N=198).

13.12 Varimax (Rotated) Factor Matrix for the Low-Achievers (N=198).

13.13 Summary of Factor Structure of the Total Sample, High-, Average-, and Low-Achieving Groups.
Correlation Coefficients between Styles of Learning Measures and Academic Achievement for the Total Sample (N=735), Indian Students (N=544), and African Students (N=191).
