ACKNOWLEDGEMENT

It is obviously impossible to thank all of one's past and present friends, who have helped in different ways in the completion of this project. The author feels, however, that this opportunity should not be allowed to pass without according special thanks to his esteemed research supervisor and guide, Dr. M.L. Lakhanpal, M.Sc., Ph.D. (Pb.), Ph.D. (Ottawa), Reader in Physical Chemistry, whose experience, encouragement, unlimited patience, cheerful disposition, fruitful discussions and good humour at all times have been invaluable. Special thanks are also due to Professor R.C. Paul, M.Sc., Ph.D. (Pb.), Ph.D. (Cantab.), Sc.D., F.R.I.C., F.N.I., Head of the Chemistry Department, for providing all the necessary laboratory facilities.

The author is also thankful to his colleagues, Sarvshri Dr. S.C. Sharma, K.S. Chhina, R. Parashar, G.S. Thakur, I.N. Joshi, H.G. Mandal and S.K. Mittal for their kind co-operation. Also the author would like to thank C.S.I.R., New Delhi, for the award of fellowship and to the Union Carbide Corporation, Canada, for the supply of polyoxypropylene glycol fractions.

(Hargobind Singh)
