Acknowledgement

No creation in this world is a solo effort. Neither is my thesis. In particular I would like to thank:

With a great sense of privilege and humble duty, I express my heartfelt gratitude and sincere thanks to my reverend supervisor Prof. C. S. Pundir, Deptt. Of Biochemistry, M.D University, Rohtak. I will always be grateful to him for his guidance, constructive criticism and constant supervision. His valuable advice and selfless encouragement rendered to me at every stage of investigation made by research work easier, interesting & meaningful. It would not have been possible to complete my Ph.D. without his encouragement and inspired devotion.

No word can accomplish for the guidance, help and advices from my co-guide Dr. Manisha Thakur, Head, Deptt. of Pathology, Dr. B.R. Sur Homeopathic College & Hospital, New Delhi. Her guidance and kind support is always remembrance to me.

I am highly thankful to Madam Snehalata Pundir who always has been caring and affectionate for all research scholars.

I render my sincere thanks to Head, Deptt. of Biochemistry, for his corporation and providing me the necessary facilities & basic infrastructure for my research work in the department. I sincerely thank to all faculty members, Deptt. of Biochemistry specially Dr Sandeep Singh & Dr Vijay Kumar for their valuable suggestions, kind cooperation, helping me in collection of resourceful literature & research papers in relation to of my research work at different stages. I am also thankful to all non-teaching staff of this Deptt. for their cooperation during this work.

It’s my fortune to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation to my sweet friends cum lab mates Sandeep and Suman di for their support and generous care. Both of them were always beside me during the happy and hard moments to push me and motivate me. I can see the good
shape of my thesis because of their help and suggestions in formatting the entire thesis.

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. I can not forget kind co-operation of my sweet friends Sheetal Chawla and Bhawna di, who were always there when I really needed them.

It is a matter of diligence to convey my thanks to my lab-mates, Rachna Rawal, Tulika Dahiya, Jagriti Narang, Nidhi Chauhan, Nidhi Kundu for their constant moral support, all time help and co-operation during entire period of my research work.
