ACKNOWLEDGMENTS

The writer wishes to tender his grateful thanks to Professor I.C. Pande, Director and Head, Centre of Advanced Study in Geology, Panjab University, Chandigarh, for suggesting the problem, for constructive criticism, for many helpful discussions and for constant guidance and encouragements throughout the work.

Sincere thanks are due to Professor J.G. Ramsay, Department of Geology, Imperial College of Science and Technology, London, for discussing the investigated problems of the Haiog area both in the field and the laboratory, for his constructive criticism while critically reading the Chapter VII of this work and for many valuable suggestions on the structural problems.

Thanks are due to Professor E. Wenz, Basel, Switzerland and Dr. W.J. Phillips, Aberystwyth, U.K. for discussing the problem in the Haiog area during the initial stages of the investigations.

The writer wishes to express a deep sense of gratitude to Dr. M.N. Saxena, Centre of Advanced Study, Panjab University, for a constructive criticism and going through a major portion of the manuscript. Thanks are also due to Professor B.S. Tewari, Centre of Advanced study in Geology, Panjab University, for helping in identification of microfossils and going through a part of the manuscript.
The writer is grateful to all his colleagues, especially Dr. A.M. Patwardhan, Messers P.S. Saklani, P.C. Bisaria, G. Mahajan, and D.S.K. Rao for their kind help during the course of investigation. The writer is thankful to Mr. C.M. Mittal, the typist, Mr. H.S. Walia, the photographer and Mr. M.C. Mankoo, the draftsman.

The financial assistance from the Centre of Advanced Study in Geology (University Grants Commission), Panjab University, is gratefully acknowledged. The writer is also grateful to his brothers Messers V.K. Srivastava and N.K. Srivastava for the financial help and constant encouragement.
