ACKNOWLEDGEMENTS

It is a pleasant privilege to express my deep sense of gratitude to my revered teacher Dr. K.K. Nanda, M.Sc., Ph.D, F.N.A., Senior Professor of Plant Physiology, Department of Botany, Panjab University, Chandigarh for introducing me to the area and imparting brilliant guidance throughout the course of this work. His unstinted help and constant supervision have been a benign inspiration to me in the successful completion of this work.

I am grateful to Professor P. N. Mehra, Head of the Department of Botany, Panjab University for providing laboratory facilities during the course of this investigation.

It is a pleasure to thank all my friends and colleagues for their friendly co-operation and keen interest in seeing me accomplish this work.

Financial assistance in the form of Senior Research Fellowship of the I.C.A.R., New Delhi, is gratefully acknowledged.
