CONTENTS

1. ACKNOWLEDGEMENTS 1
2. LIST OF ABBREVIATIONS III
3. INTRODUCTION 1
4. DISCUSSION 63

SECTION A

4.1 Chapter I 63
   Speedy and regioselective 1,2-reduction of conjugated α,β-unsaturated aldehydes and ketones using sodium borohydride-iodine

4.2 Chapter II 78
   Microwave assisted highly facile conversion of olefins to chloroiodoalkanes and iodohydrins in the presence of quinolinium chlorochromate -iodine

4.3 Chapter III 84
   Functional group transformations of diols, cyclic ethers and lactones using aqueous hydrobromic acid and phase transfer catalyst under microwave irradiation

4.4 Chapter IV 91
   Microwave promoted solid supported Finkelstein reaction of mesylates to iodides

4.5 Chapter V 100
   Preparation of conjugated aldehydes via microwave mediated quinolinium fluorochromate oxidation of functionalised benzylic and allylic alcohols

4.6 Chapter VI 109
   Selective synthesis of imines from primary amines and aldehydes via microwave irradiation and grinding over molecular sieves
SECTION B

4.7 Chapter VII  
Part A: Synthesis of pentadecyl 6-hydroxydodecanoate  
Part B: Synthesis of undecyl hexadecanoate and 12-hydroxyhentriacontane

4.8 Chapter VIII  
Synthesis of two novel fatty acids 10-methyl-6-(Z)-heptadecenoic acid and 16-methyl-8(Z)-heptadecenoic acid

4.9 Chapter IX  
Synthesis of 1-phenylheptane-1,5-dione, 7-phenylheptan-3-one and 7-phenylheptan-3-ol

5. EXPERIMENTAL

6. SUMMARY
