ACKNOWLEDGEMENT

The author expresses her deep gratitude to Dr. R.K. Bansal for suggesting the thesis topic and for his continued keen interest, guidance and supervision of the work. She is most thankful to Prof. H.S. Hans, Head of the Department of Physics, Panjab University, Chandigarh, for providing necessary facilities in the department and having a very helpful attitude towards her.

She wishes to express her thanks to Prof. R.D. Lawson and Prof. J.B. French for very useful discussions she had with them during the Summer Institutes held in 1970 and 1971 at the Department of Physics, Panjab University, Chandigarh. During her short visits to Tata Institute of Fundamental Research, Bombay and Bhabha Atomic Research Centre, Trombay, she had the benefit of having illuminating discussions with Prof. C.S. Warke, Dr. M.R. Gunye and Dr. B.P. Singh, she thanks them sincerely for their many useful suggestions.

She is most grateful to her colleague, Mr. S.K. Gandhi for helping her with computer programs and also making available to her the single-shell Matrix Elements calculated by him.

She expresses her appreciation for very helpful and friendly attitude of her colleagues during
her stay at the Panjab University. She thanks Mr. A.K. Prashar and Mr. Rakshpal Singh for their help in checking the final manuscript.

She is most thankful to her parents for continued encouragement and moral support.

She thanks Mr. D.S. Bedi for efficiently typing the thesis manuscript.

Financial assistance, for the support of this work, from the Council of Scientific and Industrial Research, the University Grants Commission and the Department of Atomic Energy, is gratefully acknowledged.

Santosh Shelly
