List of Illustrations .......................................... (viii)

## CHAPTER

### I  INTRODUCTION

- Specific Requirements of Volleyball  ........................................ 7
- Concept of Specificity ..................................................... 14
- Statement of the Problem ............................................... 16
- Definitions and Explanation of Fitness .................................. 17
- Definitions of Motor Fitness Components ................................ 17
- Objectives of the Study .................................................. 22
- Delimitations .................................................................. 23
- Limitations .................................................................... 23
- Significance of the Problem ............................................. 24

### II  REVIEW OF RELATED LITERATURE

- Test Construction Studies ............................................... 25
- Skill Related Specific Fitness Studies ................................ 35
- Fitness Studies Related to Volleyball ................................. 47
- Critical Analysis .......................................................... 56

### III  PROCEDURE

- Selection of Subjects ................................................... 59
- Selection of Motor Fitness Tests ...................................... 59
- Fitness Components and Tests Selected for the Study ............. 60
- Reliability of the Data .................................................... 61
- Tester's Competency ...................................................... 62
- Subjects Reliability ...................................................... 62
Reliability of the Tests
Criterion: Composite Scores
Collection of Data
Collection of Data for the First Phase of the Study
Organisation of Tests
Test Administration and Procedure
The Second Phase of the Study and Collection of Data
Administration of the Selected Motor Fitness Test for the Development of Norms
Statistical Procedure
Development of Test Battery and Norms

IV ANALYSIS OF DATA AND RESULTS OF THE STUDY

Factor Analysis of Motor Fitness Test Variables
Identification of Factors Underlying Motor Fitness Components
Intercorrelation Matrix
Factorial Structure Underlying Motor Fitness Variables of Volleyball Female Players
Selection of Motor Fitness Test Battery for Volleyball Female Players
Procedure Adopted for Establishing Scientific Authenticity
Reliability
Objectivity
Validity
Development of Norms
Norms
Discussion of Findings

V SUMMARY, CONCLUSIONS AND IMPLICATIONS

Summary
Conclusions ........................................ 163
Recommendations ................................. 165

APPENDICES ...................................... 167-193

A. Raw Scores of Test Items Collected for Factor Analysis ........................................ 167-178
B. Raw Scores of the Motor Fitness Tests for Female Volleyball Players for establishing validity ........................................ 179
C. Raw Scores of the Motor Fitness Tests for Female Non-Volleyball Players for establishing Validity and Specificity ........................................ 180
D. Raw scores of Motor Fitness Tests of Female Volleyball Players for establishing Validity ........................................ 181
E. Raw Scores of the Motor Fitness Tests of Female Volleyball Players for establishing Reliability ........................................ 183
F. Raw scores of the Motor Fitness Tests of Female Volleyball Players for establishing Objectivity ........................................ 183
G. Raw Scores of Motor Fitness Test for Female Players Collected for Preparation of Norms. ........................................ 184-193

- BIBLIOGRAPHY .................................. 194-202
