

ACKNOWLEDGEMENTS

The author is highly indebted to Prof. P.G. Deo, Ph.D., D.Sc., F.Inst.P.(Lond.), M.A.S.M. (Ohio), Head, Department of Applied Sciences, Punjab Engineering College, Chandigarh, for suggesting the problem, for providing facilities to work and for the valuable guidance throughout the course of the investigations reported in this thesis.

The author welcomes this opportunity to record his grateful thanks to Principal G.C. Khanna, Punjab Engineering College, Chandigarh and the ex-Principal R.L. Khanna for their kind interest and permission to work.

Sincere thanks of the author are due to Prof. B.M. Anand, M.Sc., Ph.D.(Bristol), Head, Deptt. of Physics, Panjab University, Chandigarh, for encouragement and for providing library facilities.

Thanks are also due to the Council of Scientific and Industrial Research, New Delhi, and the Department of Atomic Energy, Bombay, for the award of Research Fellowship and the research grants to facilitate this work.
