

C O N T E N T S

Chapter

I	INTRODUCTION	1
	Origin of Dislocations in Crystals	1
	Detection of Dislocations	5
	Resume of the Investigations Reported	14
	Bibliography	18
II	EXPERIMENTAL TECHNIQUES	24
	Crystal Growing	24
	Cleaving	25
	Etching	26
	Stress Birefringence	33
	Multiple Beam Interferometry	36
	Bibliography	42
III	DISLOCATIONS AND IMPURITY SUBSTRUCTURES IN CRYSTALS GROWN FROM MELT	44
	Crystal Growth in an Imposed Temperature Gradient	46
	Constitutional Supercooling and Solid-liquid Interface	56
	Experimental	63
	Results and Discussion	68
	Platelet Structure	70
	Cellular Structure	77
	Geometry of Cells	79
	Cellular Dendrites	83
	Impurities and Dislocation Nucleation	85
	Dislocations in Platelet Structure	86
	Dislocations in Cellular Structure	88
	Summary	100
	Bibliography	103

IV	DISLOCATION ETCH TUNNELS, ETCH GROOVES AND WHISKERS	106
	Experimental	108
	Results and Discussion	108
	Tunnels and Etch pit formation	112
	Dislocations and Etch tunnels	116
	Dislocations and Etch grooves	121
	Sodium Chloride whiskers	126
	Summary	137
	Bibliography	139
V	SPIRAL CONFIGURATIONS IN SODIUM CHLORIDE	141
	Experimental	142
	Results and Discussion	145
	Indentation and Plastic deformation	145
	Frank-Read type spirals	149
	Dissolution spirals	159
	Summary	167
	Bibliography	169
VI	FRACTURE IN SODIUM CHLORIDE	172
	Results and Discussion	174
	Cleavage Surface and Crack Velocity	177
	Glide at the Crack tip	181
	Non-cleavage plane Fracture	185
	Summary	192
	Bibliography	193
VII	THERMAL ETCHING AND DISLOCATION MOTION	195
	Experimental Results	197
	Discussion	202
	Dislocation motion	204
	Resistance to Dislocation glide	206
