ACKNOWLEDGEMENTS

I really feel great while expressing my gratitude to all those who gave their supporting hands and stayed with me as a constant source of inspiration throughout my research work.

It is my profound privilege to express my heartfelt gratitude and extreme sense of indebtedness to my revered supervisors Prof. Rupinder Tewari, Department of Biotechnology and Prof. D.D. Bansal, Department of Biochemistry, Panjab University, Chandigarh for their erudite guidance, invaluable suggestions and constant encouragement throughout the course of this study and for providing me all the laboratory facilities.

My deep regard and sincere thanks are due to all of the faculty members and non-teaching staff of the department for their wholehearted cooperation and assistance.

I am very thankful to Dr. Sarju Ralhan, Consultant, Cardiac Surgeon, Hero DMC Heart Institute, Ludhiana for the recruitment of T2DM patients and control subjects.

The help extended by Dr. D.K. Sanghera, Asst. Professor, Department of Human Genetics, University of Pittsburgh, USA for this study is greatly acknowledged.

Words can not adequately express my sincere thanks to Prof. S.K. Kulkarni, Dean University Instructions and Co-ordinator, Centre with potential for excellence in biomedical research, Panjab University, Chandigarh for allowing me to use the necessary facilities available at the centre.
I am indeed grateful to Dr. Sarabjit Singh Mastana, Asst. Professor, Department of Human Genetics, School of Human Sciences, Loughborough University, Leicestershire, U.K. for carrying out the statistical analysis of the present data.

My special thanks are also due to my lab colleagues and all my friends for extending me direct and indirect support from time to time during the execution of this project.

The financial assistance from CSIR in the form of JRF/SRF is gratefully acknowledged.

Words fail me express my immense gratitude and deep indebtedness to my loving wife, Gurjit Kaur Bhatti whose forbearance, inspiration and moral support throughout my research work, without whose generosity, it would not have been possible for me to translate my dream to reality.

My special thanks are also extended to all the volunteers who rendered repeated help during field recruitments and all the human subjects who participated for carrying out the present investigations.

Last but not least, I am grateful to the Almighty for giving me such loving parents and in-laws and my daughter, Angel who with their inspiring love, affection and moral support, helped me throughout to realize my ambition of academic pursuit.

(Jasvinder Singh Bhatti)
