CHAPTER I
1. PROCESSES OF THE ELASTIC SCATTERING OF GAMMA RAYS
   1. Introduction 1
   2. Theoretical aspects of the elastic scattering processes
      1) Nuclear Thomson scattering 3
      2) Rayleigh scattering 4
      3) Delbrück scattering 17
      4) Nuclear resonance scattering 19
   3. Interference effects in the elastic scattering processes 19
   4. Previous experimental data on the elastic scattering of gamma rays 21
      1) Measurement of the elastic scattering cross-sections 21
      2) Measurement of linear polarization of the elastic scattering of gamma rays 29
   5. Conclusions 31

CHAPTER II
MEASUREMENTS OF Z-DEPENDENCE OF ELASTIC SCATTERING CROSS SECTIONS OF GAMMA RAYS AT SMALL SCATTERING ANGLES
1. Introduction 33
2. Experimental arrangement 34
3. **Experimental method**  
   i) Measurement of total differential scattering cross-section  
   ii) Evaluation of the differential elastic scattering cross-section.

4. **Corrections**  
   i) Correction for scattering-dependent background  
   ii) Absorption correction  
   iii) Other corrections

5. **Results and Discussion**

6. **Conclusions**

---

**CHAPTER III**

**MEASUREMENTS OF Z-DEPENDENCE OF ELASTIC SCATTERING CROSS SECTIONS OF GAMMA RAYS AT LARGE SCATTERING ANGLES.**

1. **Introduction**
2. **Experimental arrangement**
3. **Analysis of scattered spectrum**
4. **Measurement of cross-section**
5. **Results and Discussion**  
   i) Z-dependence of elastic scattering cross-sections  
   ii) Variation of index (n) with momentum transfer  
   iii) Interpolation of cross-sections for mercury

6. **Conclusions**
CHAPTER IV

ESTIMATION OF ELASTIC SCATTERING CROSS-SECTIONS
OF GAMMA RAYS FROM DIFFERENT ELEMENTS.

1. Introduction
   81
2. Method of Estimation
   81
3. Results and discussion
   86
4. Conclusions
   99

CHAPTER V

POLARIZATION OF ELASTICALLY SCATTERED GAMMA RAYS

1. Introduction
   90
2. Theoretical considerations
   90
   1) Polarization of Rayleigh scattering from K-shell electrons
      90
   2) Contribution of Nuclear Thomson scattering
      92
   3) Contribution of L-shell electrons
      93
3. Gamma-ray Polarimeter
   1) Compton scattering as the analysing process
      94
   2) Polarization analyser
      97
   3) Sensitivity of the analyser
      99
   4) Calibration of the analyser
      102
   5) Design of the Polarimeter
      103
   6) Performance of the Polarimeter
      105
4. Experimental measurement of the polarization
   of elastically scattered gamma rays
   111
   1) Experimental method
      111
   2) Contribution of elastic and inelastic
      scattering to the scattered radiation
      112
   3) Method and results
      114
iv) Influence of inelastic scattering on the polarization of elastic scattering of gamma rays.

5. Conclusions
