It has been a great privilege for me to work under Padma Shri Prof. P. N. Mehra, D.Sc., F.N.I., F.N.A.Sc., F.B.S., Head of the Department of Botany, Panjab University, Chandigarh (India). The keen interest which he took in this problem and the knowledgeable comments which he offered from time to time have all helped me in a considerable way in accomplishing this task. My gratitude to him cannot be adequately expressed in words.

This work was done as a part of the team in a project assigned to Prof. P. N. Mehra as the Principal Investigator, which was sponsored and financed under the U.S. PL 480 funds. My sincere thanks are due to the PL 480 authorities for the financial help.

I am thankful to Dr. O. P. Sharna, Associate Professor, Agriculture Complex, Himachal Pradesh University, Palampur, for his help in the photomicrography.

I also thank cordially Mr. K.S. Pathania, Reader, Department of Botany, Panjab University, Chandigarh, for his help during the excursions.

Last but not the least my thanks are also due to Mr. A.C. Mankoo, the artist, for the help rendered from time to time.
