ACKNOWLEDGEMENTS

It gives me an immense pleasure to express my deep sense of gratitude to my supervisor, Dr. S. R. Mehta for his inspiring guidance, encouragement and continuous advice. What has sustained me is an unending understanding shown by him at every step of this research work.

My sincere thanks are due to the staff of Medical College Hospital, Rohtak for their help and cooperation. I am specially grateful to the Nursing Superintendent Mrs. Malhotra whose affection and understanding kept me going during my data collection and also provided me an insight into this profession.

A special line of appreciation to all the respondents who have made the study possible.

I am obliged to my father in law Sh. Chet Ram Katyal and my sister in law Dr. Anita Katyal for their consideration and cooperation which acted as a moral booster for me to carry on this work.

Finally, I place on record my very special thanks to my husband, Anil, who has helped me in so many ways which I find impossible to put on this piece of paper.

RINA CHOWDHRY
