ACKNOWLEDGEMENTS

Time has provided me the cherished opportunity to express my heartfelt gratitude to my worthy teacher and guide, Dr. R.K. Kohli, Reader, Department of Botany, Panjab University, Chandigarh. His inspiring, consistently calm and deep involvement in the study, right from its inception till the final completion, professional excellence and immaculate meticulousness had a direct imprint on the execution of the project and its manuscript. I consider myself fortunate for having been given the opportunity to carry out this research work under his able guidance and his ability to draw out the best from his students.

I sincerely thank Prof. C.L. Mandahar, Chairman; Prof. S.S. Kumar, Ex-chairman, Department of Botany, for providing me with the best available laboratory facilities. I appreciate the timely help of all the teaching and non-teaching staff members of the Department.

It is my pleasure to acknowledge thanks to all my well-wishers and friends who helped me in my research work.

The scientific support in the form of chemical analysis rendered by Dr. D.B. Saxena, Senior Chemist, Division of Agricultural Chemicals, Indian Agricultural Research Institute and Mr. K.L. Choudhary, Department of Pharmacy, Panjab University, Chandigarh, is commended and thankfully acknowledged. Thanks are also due to Dr. R.C. Verma, Department of Physics, H.P. University, Shimla, for ever ready help.

I deeply acknowledge the financial assistance from the Department of Environment, Ministry of Environment and Forests, Government of India and CSIR, New Delhi in the form of research fellowship.

Above all, much more than usual debt of gratitude must be expressed to my mother and other family members, who always encouraged me throughout my academic pursuits. I take this opportunity to bow affectionately to them.

Last but not the least, I wish to express my thanks to all those who remained behind screen but whose work has often been consulted and quoted in present manuscript.

Date: 15 April, 1991.
