ACKNOWLEDGEMENTS

It is a pleasure to express my deep sense of gratitude to Professor A. Sahni, Centre of Advanced Study in Geology, Panjab University, Chandigarh, who suggested this study and whose able guidance and help throughout the course of this work, was a source of constant encouragement.

I am deeply thankful to Professor S. B. Bhatia, Chairman CAS in Geology, Panjab University, Chandigarh for providing me all necessary laboratory facilities, for loan of literature and for his constructive suggestions. I have also been benefitted considerably from the advice and comments of Professor V. J. Gupta, Dean of Student Welfare. I would also like to take this opportunity of thanking Prof. A. D. Kharakwal under whose chairmanship this study was initiated.

Professors J. L. Hertenberger, J. Sudre and M. Vianey - Liaud of the Laboratory of Palaeontology, Montpellier University (France) spent a considerable part of their time with me in field and gave me much help. To them, I am indeed thankful.

I have benefited considerably from the detailed correspondence with Professor D. Nolf, Koninklijk Belgisch Institute Voor Natuurwetenschappen Vautierstraat, Brussel,
particularly from his comments and suggestions on fossil otoliths.

I also wish to extend my thanks to Professor M. Gayet, Institute of Palaeontology, Paris, and Professor J. C. Rage, Laboratory of Vertebrate Palaeontology University of Paris, France for their help in identification of the lower vertebrates.

Throughout the course of this study, both in the field and in the laboratory, Dr. Kishor Kumar, my senior research colleague gave me unfailing help and advice for which I extend him special thanks.

I extend my sincere thanks to my research colleagues Dr. B.N. Tewari, B.S. Kotlia, G.V.R. Prasad, Bhuvan Sharma, R. S. Loyal, P. S. Suri, D. B. Guha, R. S. Batra, Bimal Roy, Asit Jolly and N. N. Dogra for their kind cooperation. Prasad helped me during the last two field trips.

Without the assistance and friendly cooperation of the Geology Department, Nagpur University, the processing of the material would have been impossible. Special thanks are, therefore, due to Prof. Y. G. Dekate, Prof. P.H. Kulkarani; Dr. P. M. Tapaswi and S. K. Pande.

I would like to thank Messrs. S. S. Pawar, S. Mithailal, S. C. Minhash and Gyan Chandra and other staff members of the Centre for their help throughout
the course of this work.

Initially, liberal financial support was given by my elder brothers, Sarvshri S.S. Rana and N. S. Rana and Uncle D. S. Bhandari, without whose help, this work could not have been successfully completed, words fail me to express my heartfelt gratitude to them.

Special thanks are due to M/s Sarabjit Reprographic Centre for the excellence shown in typing/Photocopying of this dissertation.

Lastly, I record my sincere thanks to CAS in geology, Panjab University, Chandigarh for providing me Junior Research Fellowship (No.21712/EsU), during the last phase of this study.
