ACKNOWLEDGEMENTS

First of all, I am very thankful to my research supervisor Professor H. Niranjana Murthy, who has given me an opportunity to work under his guidance for this project which has taught so many lessons to me either personally or professionally. Honestly, I consider myself very lucky to work under Prof. Murthy, who himself is a model for others with his continuous efforts to improvise himself everyday by totally committing towards the science projects. Every time, he is occupied with persons associated with research or students who come regularly to seek his advice in various aspects.

I am thankful to Professor Ch. Ramesh, Chairman, P.G. Department of Studies in Botany, for providing research facilities. Also I thank Prof. G.R. Hegde, Prof. H.C. Lakshman, Prof. M Jayaraj, Prof. T.C. Taranath, Dr. G.S. Mulagund for their guidance during my tenure. Also, I am indebted to Dr. Sujatha, DOR, Hyderabad, her student Mr. Pratap for helping me to carry out the flow cytometric analysis by sparing their valuable time. Similarly, Mr. Ramesh Babu of KIMS has helped in providing the radiation facilities to carry out my research work without which I would never have completed my studies. Also, I thank the doctoral committee members for their inputs.

I would like to thank Ashokanna for dragging me back to the research when I was lost in the busy schedules of corporate culture. Also, I extend my thanks to my lab mates Nayeem, Praveen, madam Vijayalaxmi and Jayasudha, Poorna, Manohar, Shaja, Lalita, Sunita, Abhishek, Shivanand and Krishna for their wonderful company. Also, I am thankful to non-teaching staff, especially Mr. Bhat for his extended help in day to day activities and attendors of the P.G. Department of Studies in Botany. Also, the research scholars of this department have certainly helped in one or the other way during my stay in this department in most of the situations. I am thankful to them also.

During my Ph.D. course, the financial assistance was provided by UGC without which I would never have come to this department for higher studies. I am thankful to them. Also, my family members and in-laws have supported in all the ways by taking my responsibilities on their shoulders thus assisting in completing my studies. So I would like to acknowledge their support also. My family friends Damle, Godbole Ajith, Prasad Bhatru and their family, Gopal Marathe and family, Vinodanna, my teachers Kusumamadam, Shashidhar, friends Kameshwara, Anand, Vinayak, RG, Yogesh, Raghava, Somsekhar, Rajanna, Madhu, Ajeya, Prakash, Santosh, Prasanna, Sikander, Chotelal,
Mallikarjun, Mahantesha, all have supported in various situations. Thanks are due to them also.

Much of all, my wife Chethana and my mother struggled a lot and in spite of that they have never shown any sign of discomfort during my studies. I never bothered about their pain and sacrifices which they have made while supporting me. I even never came to know certain difficult situations by which they were passing by. I cannot acknowledge for this and more over this debt will always be on me till my life. I will have to take birth several times to nullify this debt I presume. Finally, I thank the almighty for everything in my life.

Manoj Godbole
