CONTENTS

Acknowledgement (1)

Chapter I
Introduction 1

Chapter II
Review of the Previous Work 3

Part A
Transport properties of small molecules
1. Viscosity 3
2. Viscosity of solutions and intrinsic viscosity 4
3. Diffusion and diffusion coefficient 5
4. Spherical particles 6
5. Empirical equations 7
6. Freely draining molecules 8
7. Chain statistics 12
8. Hydrodynamic interaction included 16

Review of experimental data
9. Diffusion coefficient of short-chain molecules 26
10. Intrinsic viscosity 31

Part B
11. Thermodynamic properties 35
12. Review of excess volume data of some binary mixtures 38
Chapter III  Experimental

1. Density
2. Viscosity determination
3. Diffusion measurements

Chapter IV  Treatment of Experimental Data and Limit of Precision

1. Excess volume
2. Intrinsic viscosity
3. Diffusion coefficient

Chapter V  Results and Discussion

Part A
Hydrodynamic Properties

Part B
Excess Volume

Chapter VI  Summary

Appendices
I. Data of viscosities
II. List of tables
III. List of figures
IV. List of symbols used
