ACKNOWLEDGEMENTS

This thesis would not have been possible without the inspiration and support of many individuals. My thanks and appreciation to all of them for being part of this journey and making this thesis possible.

I owe my deepest gratitude to my supervisors Dr. D. R. Saini and Dr. Shirish H. Sonawane. Without their enthusiasm, encouragement, support and continuous optimism this thesis would hardly have been completed. I am extremely grateful to them for their guidance and all the useful discussions and brainstorming sessions, especially during the difficult conceptual development stage. I had a great freedom to plan and execute my ideas in research without any pressure.

Very special thanks to the Indian Academy of Science, Bangalore for providing me a summer research fellowship. I gratefully acknowledge Prof. (Dr.) A. B. Pandit (Institute of Chemical Technology, Mumbai) for his valuable guidance during summer research fellowship and his everlasting encouragement, support and blessings during my research work. I would also like to express sincere thanks to Dr. P. R. Gogate (Institute of Chemical Technology, Mumbai) for his valuable suggestions during summer research fellowship.

I would also like to take this opportunity to thank Dr. D. S. Bhatkhande (Head of Chemical Engineering Department), Dr. J. V. Kulkarni (Dean-Administration and Registrar) and Dr. R. M. Jalnekar (Director), Vishwakarma Institute of Technology for their valuable suggestions and administrative support.

Special thanks to my friends Prof. Bharat Bhanaavase and Prof. Manik Deosarkar for staying alongside me at all the times. I can honestly say that it was their determination and constant encouragement that ultimately made it possible for me to see this project through to the end. I would like to express my sincere thanks to Prof. Maghade, Prof. G. M. Malwatkar, Mr. S. R. Kulkarni and all other teaching staff of Chemical Engineering Department of Vishwakarma Institute of Technology.

I am forever thankful to my labmates Sameer Kapole, Shailesh Ghodke, Prashant Jolhe, Shrikant Barkade, Chetan Kapadnis, Vijay Bankar and Mrs. Sunita Raut for their support and for creating a cordial working environment. I would like to express special thanks to Mr. Dipak V. Pinjari for his valuable support for my experimental
work during my summer research fellowship work at Institute of Chemical Technology, Mumbai. Very special thanks to Dr. Shashank Gaikwad (NCL, Pune) for providing me the analytical facilities at NCL, Pune.

Special thanks are also due to Dr. Vasi Shaikh, Prof. R. W. Gaikwad, Dr. Somnath Nandi, Prof. T. A. Jadhav and Prof. Ashish Ekatpure for their constant encouragement for completion of this work.

I would also like to thank all my colleagues at Department of Chemical Engineering, Sinhgad College of Engineering as well as other administrative and non-teaching staff of Sinhgad College of Engineering for their timely help.

My deep and sincere gratitude to my parents and all family members for their continuous and unparalleled love, help and support. I am thankful to my wife Sonia, my daughter Samiksha and son Satyam for their love, patience, and understanding. This journey would not have been possible without their support and I dedicate this milestone to them.

Thanks a lot to one and all and apologies to those whom I may have missed out unintentionally.

Sachin R. Shirsath
