Statistical Inference in Queues:

Static Models:

Bailey, N.T.J. (1952) 'Study of Queues and Appointment Systems in Out-Patient Department with Special Reference to Waiting times', JRSS, B, 14, 185-199.

Dynamic Models: Arrival Control

1. Acceptance or Rejection of Customers:

Scott, M. (1970) 'Queueing with Control on the Arrival of certain Types of Customers', CORS J. 8, 75-86.

2. Adjust the Mean Arrival Rate:

3. Pricing Policies:

4. Self Optimization vs. Social Optimization:

Dynamic Models: Service Control

1. Server on or off:

2. Variable number of servers:

Bell, C.E. (1975) 'Turning off a Server with Customers Present: Is This Any Way to Run an M|M|c Queue with Removable servers?', Opns. Res. 23, 571-574.

Teghem, J.Jr. (1975) 'Properties of (0,k) Policy in a M|G|1 Queue and optimal joining rules in a M|M|1 Queue with removable server', Opns. Res. 229-259.

Teghem, J.Jr. (1986) 'Control of the service process in a Queueing System', EJOR(Netherlands), 23, 141-158.

3. Rate Control Policies:

Akihiko Tahara (1975) 'Optimal Allocation of service rates for Multi-server Markovian Queue', JORS of Japan, 18, 90-96.

Crabill, T. B. (1972) 'Optimal Control of Service facility with variable exponential service times and constant arrival rate', Management Science, 18, 560-566.

Sabeti, H. (1973) 'Optimal selection of service rates in Queueing
with different cost', JORS of Japan, 16,15-35.

Control of Queue Discipline:

Control of Bulk Queues:

Makis, V. (1985a) 'Optimal control characteristics of a Queueing System with batch services', Kybernetika, 21, 197-212.

Control Problems in Machine Interference:

Control of Series Queues:

Control of Network of Queues:

Miscellaneous References:

Epstein, B. (1960) 'Tests for the validity of the assumption that the underlying distribution of life is exponential-II'. Technometrics, 2, 167-183.

Pollaczek, F. (1930) 'Uber eine Aufgabe der Wahrscheinlichkeitsstatik'. Mathematische Zeitschrift, 32, 64-100 and 729-750.
