3.1 Introduction

LISA is an international abstracting and indexing service designed for library professionals and other information specialist, LISA provided bibliographic information about past and present developments in librarianship, information science, online retrieval, publishing and information technology. This database covers around five hundred periodicals from over sixty countries. It also includes unpublished academic and institutional research from the IRWI- Information Research Watch International database.

3.2 Subject Coverage

- Library Management
- Collection development
- Cataloguing and classification
- Library Technology
- Information retrieval
- Digital Libraries
- Evidence based Librarianship
- Copyright
- Intelligence and national security
- E-learning
- Knowledge Management
- Information Literacy
- Freedom of information
- Electronic publishing
- E-government
- Taxonomies and ontologies
- Digital rights management
- Professional development
- The semantic web
- Scholarly communication
- Open access
- Digital preservation
- Search engine
- Social Inclusion
- E-commerce
- Consumer health information.
3.3 Selection Policy

LISA has an international perspective and a diverse audience including researcher, students, library staff and information professional. Since its inception in 1969 LISA has been interested in a broad range of library and information science (LIS) theory and practice, now taking in developments facilities by information and communication technology and LIS-related fields such as archives, records, management, publishing, information design and technical writing. Consequently, LISA covers a great variety of publications.

In considering candidate journals at the scholarly end the editor takes account of range of standard criteria, e.g. publishing standard, timeliness, editorial content, peer review, international diversity of authorship and citation data. The editor also need to have an eye for current trends and growth points within the field – at the moment, for example in development in web-based distance education and electronic government. LISA is also interested in important but more topically-oriented journal and magazines, such as the CILIP “Updated” in the UK or “Bibliotecche Oggi” in Italy and in smaller more limited publication which deal with specialist areas of interest to the library community (e.g.“The One Person Library”)

There are around 500 titles on Illumina, 26 of which are e-journals.

3.5 Library and Information Science Abstracts (LISA)

Rutgers Restricted Access- Off-camp users will be prompted to log in.

Description.-LISA: Library and Information Science Abstracts is an international abstracting and indexing tool designed for library professionals and other information specialists. Major areas of coverage include:

- Artificial intelligence
- Book reviews
- CD-ROMs
- Computer science applications
- Information centres
- Information management
- Information science
- Information storage
- Information technology
- Internet technology

ICT Infrastructure in University Libraries of Karnataka

Author: Walmiki, R H1; Ramakrishnegowda, K C1Kuvempu University, Shankaraghatta -577 541, Shivamogga
- District, Karnataka wrh@kuvempu.ac.in

ProQuest document link

Abstract: Survey of the status of ICT infrastructure in six selected university libraries of Karnataka revealed that the libraries greatly vary from one to another as far as the ICT infrastructure is concerned. Most of the libraries lack sufficient hardware and software facilities and do not have adequate internet nodes and bandwidth. The campus LANs of the universities are not fully extended to exploit the benefits of digital information environment. Adapted from the source document.
